PACIFIC LIFE & ANNUITY COMPANY**

NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND GOING CONCERN

A. Accounting Practices:

The accompanying financial statements of Pacific Life & Annuity Company (the Company) are presented in accordance with the National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures Manual* (NAIC SAP) as adopted by the Arizona Department of Insurance and Financial Institutions (AZ DIFI).

The following table reconciles the Company's net income for the nine months ended September 30, 2021 and the year ended December 31, 2020 and statutory surplus as of September 30, 2021 and December 31, 2020 between NAIC SAP and practices prescribed and permitted by the AZ DIFI:

	SSAP #	F/S Page	F/S Line	September 30, 2021	December 31, 2020
NET INCOME					
1. Net Income, Arizona Basis (Page 4, Line 35, Columns 1 & 3)	XXX	XXX	XXX	\$19,924,529	\$7,365,090
2. State Prescribed Practices That Are an Increase/(Decrease) from NAIC SAP:				0	0
3. State Permitted Practices That Are an Increase/(Decrease) from NAIC SAP:				0	0
4. Net Income, NAIC SAP (1-2-3=4)	XXX	XXX	XXX	<u>\$19,924,529</u>	<u>\$7,365,090</u>

B. No significant change

C. Accounting Policies:

1. No significant change

2. Bonds not backed by other loans are generally stated at amortized cost using the effective interest method. Bonds, including loan-backed and structured securities (LBASS), with a NAIC designation of 6 are stated at the lower of amortized cost or fair value with changes in fair value recorded in unassigned surplus as a change in net unrealized capital gains (losses) less tax.

3-5. No significant change

6. LBASS are generally stated at amortized cost using the effective interest method. Income is determined considering anticipated cash flows based on industry prepayment models and internal estimates. These assumptions are consistent with the current interest rate and economic conditions at the time of valuation. For LBASS purchased with high credit quality and fixed interest rates, the effective yield is recalculated on a retrospective basis. For all other LBASS, including those where cash flows are deemed other than temporarily impaired, effective yield is recalculated on a prospective basis.

7-13. No significant change

D. Going Concern: The Company is not aware of any current situation or event that would cause substantial doubt about its ability to continue as a going concern.

2. ACCOUNTING CHANGES AND CORRECTIONS OF ERRORS

Effective January 1, 2021, the Company adopted revisions to Statement of Statutory Accounting Principles (SSAP) No. 86, *Derivatives*, to ensure reporting consistency for derivatives with financing components. A financing derivative is one which the premium to acquire the derivative is paid throughout the derivative term, or at maturity. The revisions require that at acquisition and subsequently, the gross reported fair value of the derivative shall exclude the impact of the financing premiums and the premiums payable shall be separately reported as payable for securities. The impact of the adoption on January 1, 2021 was an increase to Derivatives (page 2, line 7) of \$0.8 million, an increase to Investment Income Due and Accrued (page 2, line 14) of \$0.8 million and an increase to Payable for Securities (page 3, line 24.09) of \$1.5 million.

Effective January 1, 2021, the Company adopted SSAP No. 26R, *Bonds*, and SSAP No. 32R, *Preferred Stock*, which clarified the valuation and measurement for perpetual preferred bonds and stocks held as investments. The perpetual preferred bonds and stocks, previously reported at amortized cost, shall now be reported at fair value, not to exceed any current effective call price, with changes in fair value recorded in unassigned surplus as a change in net unrealized capital gains (losses) less tax. The impact of this adoption on the Company's financial statements was immaterial.

Variable annuity contracts are subject to Actuarial Guideline 43 (AG43) and the Valuation Manual section VM-21 (VM-21). As a result of updates to AG43 and VM-21, effective January 1, 2020, for all variable annuity contracts, \$13.6 million of reserves were released with an offsetting adjustment in surplus, change in reserve on account of change in valuation basis, (increase) or decrease (page 4, line 43).

5. INVESTMENTS

A-C. No significant change

D. Loan-backed Securities:

1. Prepayment assumptions for LBASS were obtained from industry prepayment models and internal estimates. These assumptions are consistent with the current interest rate and economic conditions at the time of valuation.
2. No other than temporary impairments (OTTIs) were recognized on LBASS due to intent to sell or inability or lack of intent to retain the investment in the security for a period of time sufficient to recover the amortized cost basis.
3. The Company has not recognized any OTTI on its loan-backed securities based on cash flow analysis.
4. The unrealized losses of LBASS where fair value is less than cost or amortized cost for which an OTTI has not been recognized in earnings as of September 30, 2021 are as follows:

	September 30, 2021
a. The Aggregate Amount of Unrealized Losses:	
1. Less than 12 Months	\$1,564,911
2. 12 Months or Longer	43,854
b. The Aggregate Related Fair Value of Securities with Unrealized Losses:	
1. Less than 12 Months	\$72,388,761
2. 12 Months or Longer	557,117

5. Additional Information: OTTI evaluation is a quantitative and qualitative process subject to significant estimates and management judgment. The Company has controls and procedures in place to monitor securities and identify those that are subject to greater analysis for OTTI. The Company has an investment impairment committee that reviews and evaluates investments for potential OTTI at least on a quarterly basis.

In determining whether a decline in value is other than temporary, the Company considers several factors including, but not limited to the following: the extent and duration of the decline in value, the reasons for the decline (credit event, currency, or interest rate related including spread widening), the Company's inability or lack of intent to retain the investment for a period of time sufficient to recover the amortized cost basis and the performance of the security's underlying collateral and projected future cash flows. In projecting future cash flows, the Company incorporates inputs from third-party sources and applies reasonable judgment in developing assumptions used to estimate the probability and timing of collecting all contractual cash flows.

- E. The Company does not have any dollar repurchase agreements and/or securities lending agreements.
- F. The Company did not have any repurchase agreements transactions accounted for as secured borrowing.
- G. The Company did not have any reverse repurchase agreements transactions accounted for as secured borrowing.
- H. The Company did not have any repurchase agreements transactions accounted for as a sale.
- I. The Company did not have any reverse purchase agreements transactions accounted for as a sale.
- J-L. No significant change
- M. The Company does not have any working capital finance investments (WCFI).
- N. The Company does not have any offsetting and netting of assets and liabilities.
- O-Q. No significant change
- R. The Company did not participate in cash pooling.

20. FAIR VALUE MEASUREMENTS

A. The Company's financial assets and liabilities that are carried at fair value have been classified, for disclosure purposes, based on a hierarchy defined by SSAP No. 100R, *Fair Value*. The determination of fair value requires the use of observable market data when available. The hierarchy consists of the following three levels that are prioritized based on observable and unobservable inputs.

Level 1: Unadjusted quoted prices for identical instruments in active markets. Level 1 financial instruments include securities that are traded in an active exchange market.

Level 2: Observable inputs other than Level 1 prices, such as quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in inactive markets, and model-derived valuations for which all significant inputs are observable market data.

Level 3: Valuations derived from valuation techniques in which one or more significant inputs are not market observable.

Investments reported at Net Asset Value (NAV) are not captured within the fair value hierarchy, but are separately identified in the table below.

1. Fair Value Measurements of Financial Assets and Liabilities Carried at Fair Value or NAV as of September 30, 2021:

Description for Each Class of Asset or Liability	Level 1	Level 2	Level 3	Net Asset Value (NAV)	Total
a. Assets at Fair Value

Total Liabilities at Fair Value	\$0	\$4,696,713	\$32,089	\$0	\$4,728,802

(a) Consists of separate account assets that are primarily invested in mutual funds and hedge funds. Investment performance related to separate account assets is offset by corresponding amounts credited to contract holders whose liability is recorded in the separate account liabilities. Separate account liabilities are measured to equal the fair value of separate account assets.

2. Fair Value Measurements in Level 3 of the Fair Value Hierarchy:

3. Transfers in and/or out are recognized at the end of each quarter.

4. The fair values of bonds, preferred stocks and common stocks are determined by management after considering external pricing sources and internal valuation techniques. For securities with sufficient trading volume, prices are obtained from third-party pricing services. For securities that are traded infrequently, fair values are determined after evaluating prices obtained from third-party pricing services and independent brokers or are valued internally using various valuation techniques.

The Company's management analyzes and evaluates prices received from independent third parties and determines whether they are reasonable estimates of fair value. Management's analysis may include, but is not limited to, review of third-party pricing methodologies and inputs, analysis of recent trades, comparison to prices received from other third parties and development of internal models utilizing observable market data of comparable securities. The Company assesses the reasonableness of valuations received from independent brokers by considering current market dynamics and current pricing for similar securities.

**STATEMENT AS OF SEPTEMBER 30, 2021 OF THE
PACIFIC LIFE & ANNUITY COMPANY**

NOTES TO FINANCIAL STATEMENTS

For prices received from independent pricing services, the Company applies a formal process to challenge any prices received that are not considered representative of fair value. If prices received from independent pricing services are not considered reflective of market activity or representative of fair value, independent non-binding broker quotations are obtained, or an internally developed valuation is prepared. Upon evaluation, the Company determines which source represents the best estimate of fair value. Overrides of third-party prices to internally developed valuations of fair value did not produce material differences in the fair values for the majority of the portfolio; accordingly, overrides were not material. In the absence of such market observable activity, management's best estimate is used.

Fair values determined by internally derived valuation tools use market-observable data if available. Generally, this includes using an actively traded comparable security as a benchmark for pricing. These internal valuation methods primarily represent discounted cash flow models that incorporate significant assumptive inputs such as spreads, discount rates, default rates, severity and prepayment speeds. These inputs are analyzed by the Company's portfolio managers and analysts, investment accountants and risk managers. Internally-developed estimates may also use unobservable data, which reflect the Company's own assumptions about the inputs market participants would use.

Most securities priced by a major independent third-party service have been classified as Level 2, as management has verified that the significant inputs used in determining their fair values are market observable and appropriate. Externally priced securities for which fair value measurement inputs are not sufficiently transparent, such as securities valued based on broker quotations, have been classified as Level 3. Internally valued securities, including adjusted prices received from independent third parties, where significant management assumptions have been utilized in determining fair value, have been classified as Level 3. Securities categorized as Level 1 consist primarily of investments in mutual funds.

The Company applies controls over the valuation process. Prices are reviewed and approved by the Company's professional credit analysts that have industry expertise and considerable knowledge of the issuers. Management performs validation checks to determine the completeness and reasonableness of the pricing information, which include, but are not limited to, changes from identified pricing sources, significant or unusual price fluctuations above predetermined tolerance levels from the prior period, and back-testing of fair values against prices of actual trades. A group comprised of the Company's investment accountants, portfolio managers and analysts and risk managers meet to discuss any unusual items above the tolerance levels that may have been identified in the pricing review process. These items are investigated, further analysis is performed and resolutions are appropriately documented.

Derivative instruments are reported at fair value using pricing valuation models which utilize market data inputs or independent broker quotations or exchange prices for exchange-traded futures. The Company calculates the fair value of derivatives using market standard valuation methodologies for foreign currency and interest rate swaps and equity options. Internal models are used to value equity total return swaps. The derivatives are valued using mid-market inputs that are predominantly observable in the market. Inputs include, but are not limited to, interest swap rates, foreign currency forward and spot rates, credit spreads and correlations, interest volatility, equity volatility and equity index levels. On a monthly basis, the Company performs an analysis of derivative valuations, which includes both quantitative and qualitative analyses. Examples of procedures performed include, but are not limited to, review of pricing statistics and trends, analysis of the impacts of changes in the market environment and review of changes in the market value for each derivative by both risk managers and investment accountants. Internally calculated fair values are reviewed and compared to external broker fair values for reasonableness.

Derivative instruments classified as Level 1 are exchange-traded. Derivative instruments classified as Level 2 primarily include foreign currency and interest rate swaps. The derivative valuations are determined using pricing models with inputs that are observable in the market or can be derived principally from or corroborated by observable market data, primarily interest swap rates, interest rate volatility and foreign currency forward and spot rates.

Derivative instruments classified as Level 3 include complex derivatives, such as equity options and total return swaps. These derivatives are valued using pricing models which utilize both observable and unobservable inputs, primarily interest rate volatility, equity volatility, equity index levels and, to a lesser extent, broker quotations. A derivative instrument containing Level 2 inputs would be classified as a Level 3 financial instrument in its entirety if it has at least one significant Level 3 input.

The fair value of separate account assets is based on the fair value or NAV of the underlying assets. Separate account assets held at fair value primarily consist of mutual funds and hedge funds.

Level 1 separate account assets include mutual funds that are valued based on reported net asset values provided by fund managers daily and can be redeemed without restriction. Management performs validation checks to determine the reasonableness of the pricing information, which include, but are not limited to, price fluctuations above predetermined thresholds from the prior day and validation against similar funds or indices. Variances are investigated, further analysis is performed and resolutions are appropriately documented.

B. Disclosure of Fair Value of Financial Instruments:

The following methods and assumptions were used to estimate the fair value of these financial instruments as of September 30, 2021:

Mortgage Loans: The fair value of the mortgage loan portfolio is determined by discounting the estimated future cash flows, using current rates that are applicable to similar yield, credit quality, property type and average maturity of the composite portfolio.

Cash and Cash Equivalents: Cash equivalents are money market mutual funds that have fair values that approximate their book/adjusted carrying values due to the short maturities of the underlying investments of the funds. The carrying value of cash approximates the fair value.

Contract Loans: The admitted value of contract loans is a reasonable estimate of fair value because interest rates are generally variable and based on current market rates.

Other Invested Assets: Other invested assets consist of surplus note investments held from other insurance providers. The fair value of the surplus note investments are priced by an independent pricing service as described for bonds above.

**STATEMENT AS OF SEPTEMBER 30, 2021 OF THE
PACIFIC LIFE & ANNUITY COMPANY**

NOTES TO FINANCIAL STATEMENTS

Liability for Deposit-Type Contracts: The primary methods used to determine the estimated fair value of liability for deposit-type contracts are based on discounted cash flow methodologies using significant unobservable inputs.

Separate Account Liability for Deposit-Type Contracts: The statement value of separate account liability for deposit-type contracts is reported under separate account liabilities and is a reasonable estimate of their fair value because the contractual interest rates are variable and based on current market rates.

(1) The tables above exclude the following financial instruments: investment income due and accrued and derivatives collateral receivable and payable. The fair value of these financial instruments, which are primarily classified as Level 2, approximates carrying value as they are short-term in nature such that there is minimal risk of material changes in fair value due to changes in interest rates or counterparty credit

(2) Excludes investments accounted for under the equity method

D. The Company had no investments where it was not practicable to estimate fair value.

E. Investments Measured Using the NAV Practical Expedient:

Separate account assets include hedge funds where the fair value is based on the net asset value obtained from the fund managers. Investment strategies related to separate account hedge funds include multi-strategy primarily invested in U.S. and international equity, fixed income, long/short equity, loans, derivatives, privately held companies and private partnerships. The redemption frequency is quarterly. There are no remaining lockup periods or unfunded commitments of investments measured using the NAV practical expedient as of September 30, 2021.

NOTES TO FINANCIAL STATEMENTS

21. OTHER ITEMS

A-B. No significant change

C. Other Disclosures

The Company is working with borrowers who are experiencing financial difficulty as a direct result of the COVID-19 pandemic. When necessary, the Company is providing loan modifications to assist borrowers with their present circumstances. These loans are accruing interest and are classified as current when performing under the terms of the modified loan agreement. On April 7, 2020, a group of banking agencies issued an Interagency Statement that offers practical expedients for evaluating whether loan modifications that occur in response to COVID-19 are troubled debt restructures (TDR) consistent with the Coronavirus Aid, Relief and Economic Security Act (the CARES Act). The Consolidated Appropriations Act, signed into law on December 27, 2020 extended the relief offered in the CARES Act and clarified that insurance companies are covered under the CARES Act. The Company's loan modifications fall within the guidance of either the April 7, 2020 Interagency Statement or the CARES Act, both as adopted by the NAIC under Interpretation of the Statutory Accounting Principles Working Group (INT) 20-03, and do not qualify as TDRs. As of September 30, 2021, one mortgage loan with a total book value of \$32.7 million is in a forbearance period where the Company has provided loan modifications with principal and/or interest payment relief and this mortgage loan does not qualify as a TDR.

Economic and capital market uncertainties have arisen as a result of the spread of COVID-19. The impact of COVID-19 on the Company is constantly evolving and its future effects are uncertain. It is not possible to estimate the ultimate impacts the COVID-19 pandemic may have on the global economy, markets or our business. Interest rates and equity market levels have had the most significant effect on the Company's financial statements. COVID-19 related claims have not been material as of September 30, 2021. The Company continues to actively monitor direct and indirect impacts of the pandemic on its financial statements, especially in relation to claims and the investments portfolio.

The Company has ceded reinsurance contracts in place with a reinsurer whose financial stability has deteriorated. In March 2019, the reinsurer's domiciliary state regulator issued a rehabilitation and injunction order, in which the regulator shall conduct and continue business of the reinsurer. The Company does not expect the financial deterioration of the reinsurer to have a material adverse effect on the Company's financial statements as of September 30, 2021.

The Company had \$8 million of outstanding contractual obligations to acquire private placement securities.
