NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND GOING CONCERN

A. Accounting Practices:

Pacific Life Insurance Company (the Company or Pacific Life) prepares its financial statements based on accounting practices prescribed or permitted by the Nebraska Department of Insurance (NE DOI). The National Association of Insurance Commissioners’ (NAIC) *Accounting Practices and Procedures Manual* (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the NE DOI. Prescribed statutory accounting practices include state laws and regulations. Additionally, the Director of the NE DOI has the right to permit other specific practices, which deviate from prescribed practices.

The NE DOI has approved a permitted accounting practice, effective January 1, 2022, allowing the Company to calculate the policy reserves for funding agreements based on a methodology that differs from the NAIC SAP. Policy reserves for funding agreements are calculated based on Statement of Statutory Accounting Principle (SSAP) No. 52, *Deposit-Type Contracts*, and the reserving methodologies in Appendices A-820 and A-822 which utilizes a reference rate in the valuation interest rate calculation based on an average of a historical twelve-month period ending on June 30 of the calendar year of issue or purchase. In the permitted practice, the Company utilizes a reference rate in the valuation interest rate calculation based on the day of the funding agreement issuance which results in a policy reserve less than or equal to the NAIC SAP policy reserve.

The following table reconciles the Company’s net income for the years ended December 31, 2024 and 2023 and statutory surplus as of December 31, 2024 and 2023, between NAIC SAP and practices prescribed and permitted by the NE DOI:

B. Use of Estimates in the Preparation of the Financial Statements:

The preparation of financial statements in conformity with accounting practices prescribed or permitted by regulatory authorities requires management to make estimates and assumptions that affect the reported amounts of admitted assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

C. Accounting Policies:

Life insurance premiums are recognized as income when due from the policyholder under the terms of the insurance contract. Premiums for flexible premium products are recognized when received from the policyholder. Annuity considerations are recognized as premiums when received.

Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred.

Payments received on deposit-type contracts, which do not incorporate any mortality or morbidity risk, are recorded directly to the liability for deposit-type contracts. Interest credited to deposit-type contracts is recorded as an expense in the summary of operations when earned under the terms of the contract.

Other accounting policies used by the Company are:

- Short-term investments are stated at amortized cost and approximate fair value. Short-term investments include, but are not limited to, bonds and commercial paper whose maturities at the time of purchase were greater than three months and less than or equal to one year. Cash and cash equivalents are stated at amortized cost and approximate fair value. Cash and cash equivalents include money market instruments, cash on deposit and highly liquid debt instruments with maturities of three months or less from purchase date.
- Bonds not backed by other loans are generally stated at amortized cost using the effective interest method. Bonds, including loan-backed and structured securities (LBASS), with a NAIC designation of 6 are stated at the lower of amortized cost or fair value with changes in fair value recorded in unassigned surplus as a change in net unrealized capital gains (losses) less tax. Perpetual bonds that do not possess or no longer possess an effective call option shall be reported at fair value regardless of NAIC designation, otherwise reported at amortized cost.
- Investments in unaffiliated common stocks are valued at fair value with changes in fair value recorded in unassigned surplus as a change in net unrealized capital gains (losses) less tax.

NOTES TO FINANCIAL STATEMENTS

4. Preferred stocks are generally stated at amortized cost. Preferred stocks designated as low quality, lower quality and in or near default are stated at the lower of amortized cost or fair value with changes in fair value recorded in unassigned surplus as a change in net unrealized capital gains (losses) less tax. Perpetual preferred stocks are reported at fair value, not to exceed any current effective call price, with changes in fair value recorded in unassigned surplus as a change in net unrealized capital gains (losses) less tax.
5. Mortgage loans on real estate are carried at their unpaid principal balance, net of deferred origination fees, unamortized premiums and discounts and impairment losses. Mortgage loans on real estate do not include accrued interest, which is included in investment income due and accrued. Investment real estate is valued at the lower of depreciated cost or market, less related mortgage debt, cumulative write downs and valuation adjustments. Depreciation of investment real estate is computed using the straight line method over estimated useful lives, which range from 5 to 30 years.
6. LBASS are generally stated at amortized cost using the effective interest method. Income is determined considering anticipated cash flows based on industry prepayment models and internal estimates. These assumptions are consistent with the current interest rate and economic conditions at the time of valuation. For LBASS purchased with high credit quality and fixed interest rates, the effective yield is recalculated on a retrospective basis. For all other LBASS, including those where cash flows are deemed other than temporarily impaired, effective yield is recalculated on a prospective basis.
7. Investments in common stock of subsidiary and controlled affiliated insurance companies are carried at the statutory capital and surplus of the entity. Investments in non-insurance subsidiary, controlled or affiliated entities (SCA) are carried at the audited, generally accepted accounting principles in the United States of America (U.S. GAAP) equity of the investee, with adjustments taken based on statutory principles of accounting when required.

The carrying value of non-insurance SCAs where an audit was not performed are nonadmitted.

Investments in affiliated bonds are generally valued at amortized cost except those with an NAIC designation of 6, which are reported at the lower of amortized cost or fair value. Investments in affiliated mutual funds are carried at fair value.

8. The Company generally carries its investments in joint ventures, partnerships and limited liability companies based on the underlying audited U.S. GAAP equity of the investee. These investments include affiliated companies as well as those where the Company has minor ownership interests.
9. The Company applies hedge accounting as prescribed by SSAP No. 86, *Derivatives*, by designating derivative instruments as either fair value or cash flow hedges on the inception date of the hedging relationship. At the inception of the hedging relationship, the Company formally documents its risk management objective and strategy for undertaking the hedging transaction. In this documentation, the Company specifically identifies the asset, liability, firm commitment, or forecasted transaction that has been designated as the hedged item and states how the hedging instrument is expected to hedge the risks related to the hedged item. The Company formally assesses and measures effectiveness of its hedging relationships both at the hedge inception date and on an ongoing basis in accordance with its risk management policy.

Derivative instruments used in hedging transactions that meet the criteria of a highly effective hedge are considered effective hedges and are reported in the financial statements in a manner consistent with the hedged asset or liability (amortized cost or fair value). Changes in the carrying value of derivatives that qualify for hedge accounting are recorded consistently with how the changes in the carrying value of the hedged asset or liability are recorded. For foreign currency swaps, changes in fair value attributable to changes in foreign exchange rates are reflected as adjustments to unassigned surplus as a change in net unrealized foreign exchange capital gain (loss) consistent with the hedged items.

To the extent the Company chooses not to designate a derivative as a hedge or the designated derivative no longer meets the criteria of an effective hedge, the derivative is accounted for at fair value with changes in fair value recorded in unassigned surplus as a change in net unrealized capital gains (losses) less tax. When these derivative instruments are terminated, the gains and losses are reported as net realized capital gains (losses) less tax.

Carrying value is calculated based on the gross derivative asset or liability position. If the carrying value of the derivative is positive, the amount is recorded in assets, derivatives. If the carrying value of the derivative is negative, the amount is recorded in liabilities, derivatives. The Company's receivable for the return of cash collateral pledged is recorded in assets, aggregate write-ins for invested assets. The Company's obligation to return cash collateral received is recorded in liabilities, aggregate write-ins for liabilities.

Gains and losses on terminated derivative instruments that are hedging bonds are subject to the Interest Maintenance Reserve (IMR). Gains and losses on terminated forward starting swap positions that are hedging anticipatory purchases of bonds are deferred to unearned investment income if the effective date of the forward starting swap is beyond the current fiscal year. Once the effective date is within the current fiscal year, the gains and losses are transferred from unearned investment income to the IMR and amortized to net investment income over the life of the bond. Gains and losses on terminated derivative instruments that are hedging the surplus notes are recorded directly to surplus as a change in aggregate write-ins for other than special surplus funds and amortized as an increase in net investment income over the life of the surplus notes utilizing the effective interest method.

Periodic net settlements on derivatives designated as hedges are recorded on an accrual basis consistent with the hedged items and for hedging derivatives designated under SSAP No. 108, *Derivatives Hedging Variable Annuity Guarantees*, in net investment income. Periodic net settlements on derivatives not designated as hedging are recorded on an accrual basis in net investment income.

The Company also applies hedge accounting as prescribed by SSAP No. 108, *Derivatives Hedging Variable Annuity Guarantees*. Designated derivatives are reported at fair value and fair value fluctuations attributable to the hedged risk that offsets the current period change in the designated portion of the Valuation Manual VM-21 (VM-21) reserve liability are reported in realized capital gains (losses) less tax. Fair value fluctuations attributable to the hedged risk that do not offset the current period change in the designated portion of the VM-21 reserve liability are recognized as a deferred asset (admitted) reported in aggregate write-ins for other than invested assets or a deferred liability. An amount equal to the net deferred asset or liability must be allocated from unassigned funds (surplus) and presented separately within aggregate write-ins for special surplus funds. The deferred asset or liability is amortized on a straight-line basis over a period not to exceed 10 years into net realized capital gains (losses) less tax with a corresponding reallocation from special surplus adjustments to unassigned funds (surplus). See Note 8.

The periodic cash flows resulting from the termination of derivative contracts are reflected on a gross basis within the statement of cash flows. Cash received on termination, resulting in a realized gain, are reported in miscellaneous proceeds with cash paid upon termination, resulting in a realized loss, are reported in miscellaneous applications.

The Company has controls and procedures in place to monitor securities and identify those that are subject to greater analysis for OTTI. The Company has an investment impairment committee that reviews and evaluates investments for potential OTTI at least on a quarterly basis.

In determining whether a decline in value is other than temporary, the Company considers several factors including, but not limited to the following: the extent and duration of the decline in value, the reasons for the decline (credit event, currency or interest rate related including spread widening), the Company’s inability or lack of intent to retain the investment for a period of time sufficient to recover the amortized cost basis and the performance of the security’s underlying collateral and projected future cash flows. In projecting future cash flows, the Company incorporates inputs from third-party sources and applies reasonable judgment in developing assumptions used to estimate the probability and timing of collecting all contractual cash flows.

NOTES TO FINANCIAL STATEMENTS

G. Reverse Repurchase Agreements Transactions Accounted for as Secured Borrowing:

1. The Company invests cash collateral received into reverse repurchase agreements as part of its securities lending program. The Company requires that all reverse repurchase agreements must be collateralized by United States (U.S.) Treasury Securities, U.S. Agency Securities, U.S. Corporate bonds and/or U.S. Equities with a minimum margin of 102%. For the securities lending program, reverse repurchase agreements had a maximum maturity of 95 days and are indemnified by the Company's securities lending agent against counterparty default. When counterparty default and price movements of the collateral received present the primary risks for repurchase agreements, the Company mitigates such risks by mandating short maturities, applying proper haircuts and monitoring fair values daily.

The Company entered into a reverse repurchase transaction commitment of \$250 million with an unaffiliated financial institution. Under this agreement, the Company purchases U.S. Treasury Securities and loans cash, with a simultaneous agreement to resell such securities at a future date or on demand in an amount equal to the cash initially loaned plus interest. There were no amounts outstanding under this agreement as of December 31, 2024.

NOTES TO FINANCIAL STATEMENTS

8. DERIVATIVE INSTRUMENTS

A. Derivatives Under SSAP No. 86, *Derivatives*

1. Market risk is the possibility that future changes in market conditions may make the derivative financial instrument less valuable. Credit risk is defined as the possibility that a loss may occur from the failure of another party to perform in accordance with the terms of the contract, which exceeds the value of existing collateral, if any. The Company mitigates these risks through established market and credit risk limits.
2. The Company primarily utilizes derivative instruments to manage its exposure to interest rate risk, foreign currency risk and equity risk, collectively “market risk”, and credit risk. Derivative instruments are also used to manage the duration mismatch of general account assets and liabilities. Derivatives may be exchange-traded or contracted in the over-the-counter (OTC) market. The Company’s OTC derivatives are primarily bilateral contracts between two counterparties. Certain of the Company’s OTC derivatives are cleared and settled through central clearing counterparties. The Company utilizes a variety of derivative instruments including swaps, exchange-traded futures and options. See Note 16.

Fair Value Hedges

The Company offers life insurance products with indexed account options. The interest credited on the indexed accounts is a function of the underlying domestic and/or international equity index, subject to various caps, thresholds and participation rates.

The Company utilizes equity call options to hedge the credit paid to the policyholder on the underlying index for its life insurance products with indexed account options. These equity call options are contracts to buy the index at a predetermined time at a contracted price. The contracts will be net settled in cash based on differentials in the index at the time of exercise and the strike price subject to a cap, net of option premiums. These equity call options are designated as a fair value hedge under statutory accounting principles with changes in fair value recorded in net realized capital gains (losses).

The Company utilizes foreign currency interest rate swap agreements to convert floating foreign denominated liabilities to floating U.S. dollar liabilities. A foreign currency interest rate swap involves the exchange of an initial principal amount in two currencies, and the agreement to re-exchange the currencies at a future date, at an agreed-upon exchange rate. There are also periodic exchanges of interest payments in the two currencies at specified intervals, calculated using agreed-upon interest rates, exchange rates and the exchanged principal amounts. The Company enters into these agreements primarily to manage the currency risk associated with investments and liabilities that are denominated in foreign currencies.

Cash Flow Hedges

The Company utilizes foreign currency interest rate swap agreements to convert fixed or floating foreign denominated liabilities to U.S. dollar fixed liabilities.

The Company also utilizes interest rate swaps to hedge against reinvestment risk embedded in products with long durations. An interest rate swap agreement involves the exchange, at specified intervals, of interest payments resulting from the difference between fixed rate and floating rate interest amounts calculated by reference to an underlying notional amount. Generally, no cash is exchanged at the outset of the contract and no principal payments are made by either party.

Derivatives Not Designated as Hedging Instruments

The Company offers a rider on certain variable annuity contracts that guarantees net principal over specified periods, as well as riders on certain variable annuity contracts that guarantee a minimum withdrawal benefit over specified periods, subject to certain restrictions.

The Company may utilize total return swaps, exchange-traded futures and equity put options based upon domestic and international equity market indices to economically hedge the equity risk of the guarantees in its variable annuity products. Total return swaps are swaps whereby the Company agrees to exchange the difference between the economic risk and reward of an equity index and a floating rate of interest, calculated by reference to an agreed upon notional amount. Cash is paid and received over the life of the contract based on the terms of the swap. In exchange-traded futures transactions, the Company agrees to purchase or sell a specified number of contracts, the values of which are determined by the underlying equity indices, and to post variation margin on a daily basis in an amount equal to the change in the daily fair value of those contracts. The equity put options involve the exchange of an upfront payment for the return, at the end of the option agreement, of the equity index below a specified strike price. The Company also utilizes interest rate swaps to manage interest rate risk in the variable annuity products.

The Company offers fixed indexed annuity products where interest is credited to the policyholder’s account balance based on domestic and/or international equity index changes, subject to various caps or participation rates. The Company utilizes total return swaps, exchange-traded equity futures and equity call options based upon market indices to economically hedge the interest credited to the policyholder based upon the underlying equity index. These equity call option contracts involve the exchange of an upfront premium payment for the return, at the end of the option agreement, of the differentials in the index at the time of exercise and the strike price subject to a cap.

Interest rate swaps are used by the Company to reduce market risk from changes in interest rates and other interest rate exposure arising from duration mismatches between assets and liabilities.

Foreign currency interest rate swap agreements are used to convert foreign-denominated assets or liabilities to U.S. dollar assets or liabilities.

3. See Note 1.C.9.
4. The Company has equity call options with premiums which are paid at the end of the derivative contract.
5. \$932 million of option premium expense recorded in net investment income for equity options hedging indexed life insurance products was excluded from the assessment of hedge effectiveness. B. Derivatives Under SSAP No. 108, *Derivatives Hedging Variable Annuity Guarantees*

1. Hedging Relationship #0001 - Clearly Defined Hedging Strategy (CDHS) - Rho Hedge

The hedged obligation consists of a portion of the Company's guaranteed benefits on variable annuity contracts, including related minimum benefit guarantees that is sensitive to interest rate movement. Changes in interest rates impact the present value of future product cash flows (discount rate), as well as the value of the investments comprising the account value to be assessed against the guarantee. The hedged portion of the block is determined on a monthly basis based on the percentage of the economic liability being hedged.

Under this Valuation Manual section VM-21 compliant CDHS, interest rate risk may be hedged by a duration matched portfolio of interest sensitive derivatives, such as treasury futures, interest rate swaps, interest rate swaptions or treasury caps/floors. The Company entered into this hedging relationship effective January 1, 2022 and no changes have been made to the hedging strategy since inception. Hedge effectiveness is measured in accordance with the requirements outlined under SSAP No. 108 on a quarterly basis, both prospectively and retrospectively, and remains highly effective as of December 31, 2024.

2. The method of tax allocation between companies is subject to written tax sharing agreements, approved by the Company’s Board of Directors. Allocation is based upon separate return calculations with current credit for net losses to the extent utilized in the consolidated return. If the consolidated return has tax losses, intercompany balances are generally settled as refunds are received. If the consolidated return has a tax payable, the intercompany balances are generally settled as paid.
3. The Inflation Reduction Act enacted on August 16, 2022 is effective January 1, 2023 and imposes a 15% CAMT on corporations with three-year average adjusted financial statement income over \$1.0 billion. The CAMT is payable to the extent the CAMT liability exceeds the regular corporate income tax liability; however, any CAMT paid would be available as a credit with indefinite carryover that could reduce future regular tax in excess of CAMT.

Following the guidance of Statutory Accounting Principles Working Group INT 23-03, the Company has determined that it is an applicable reporting entity starting in 2024. CAMT has not been recognized on the financial statements for the year ended December 31, 2024, since the Company's regular tax liability exceeds its CAMT liability.

NOTES TO FINANCIAL STATEMENTS

10. INFORMATION CONCERNING PARENT, SUBSIDIARIES, AFFILIATES AND OTHER RELATED PARTIES

A-B. The Company provides certain subsidiaries and affiliates with services that are routine in nature. Fees for these services are determined using cost allocations or a negotiated basis intended to reflect market prices. For additional disclosures, see item F. below. See Schedule Y, Part 2 for other reportable transactions.

PLFA is the investment adviser for the Pacific Select Fund. The Pacific Select Fund is the investment vehicle provided to the Company's variable life insurance policyholders and variable annuity contract owners. Distributions to the Company from PLFA, reflecting net revenues and expenses, net of taxes, are recorded by the Company as net investment income when declared to the extent they are not in excess of undistributed accumulated earnings. Distributions from PLFA to the Company included in net investment income for the years ended December 31, 2024 and 2023 were \$91 million and \$98 million, respectively. Any undistributed net revenue and expense, net of tax, is recorded directly to surplus.

Pacific Select Distributors, LLC (PSD), a wholly-owned broker-dealer subsidiary of the Company, primarily serves as the distributor of registered investment-related products and services, principally variable life and annuity contracts issued by the Company and PL&A. In connection with PSD's distribution of these variable life and annuity contracts for the Company and PL&A, the Company incurred commission expense of \$582 million and \$486 million during the years ended December 31, 2024 and 2023, respectively. A service plan was adopted by the Pacific Select Fund whereby the Pacific Select Fund pays PSD, as distributor of the funds, a service fee in connection with services rendered or procured for shareholders of the fund or their variable contract owners. These services may include, but are not limited to, payment of compensation to broker-dealers, including PSD itself, and other financial institutions and organizations, which assist in providing any of the services. From these service fees, PSD reimbursed the Company \$74 million and \$69 million for the years ended December 31, 2024 and 2023, respectively. PSD also offers limited retail broker-dealer services that include selling variable annuities issued by the Company to customers advised by third-party fiduciaries such as trust companies and registered investment advisers. With respect to these sales, PSD acts as the broker-dealer of record for the initial sale, but does not receive commissions.

The Company's structured settlement transactions are typically designed such that an affiliated assignment company assumes settlement obligations from external parties in exchange for consideration. The affiliated assignment company then funds the assumed settlement obligations by purchasing annuity contracts from the Company. Consequently, substantially all of the Company's structured settlement annuities are sold to an affiliated assignment company. Included in the liability for aggregate reserves are insurance contracts with the affiliated assignment company with contract values of \$3.5 billion as of December 31, 2024 and 2023. Related to these contracts, the Company received \$78 million and \$241 million of premiums and annuity considerations and paid \$219 million and \$217 million of current and future policy benefits for the years ended December 31, 2024 and 2023, respectively. In addition, included in the liability for deposit-type contracts are insurance contracts with the affiliated assignment company of \$5.9 billion and \$4.6 billion as of December 31, 2024 and 2023, respectively.

During 2023 and 2024, participants previously covered by a group annuity contract at the Company were transferred to PL&A. As a result, the Company surrendered \$51 million and \$8 million of premium revenue and recognized a decrease in reserves for the same amounts as of December 31, 2024 and 2023, respectively.

During the year ended December 31, 2024, the Company did not make a capital contribution to PL&A. During the year ended December 31, 2023, the Company made a capital contribution of \$49 million in the form of bonds to PL&A.

In December 2024, PAR Vermont, a wholly owned subsidiary of the Company, paid a \$50 million dividend in the form of cash and bonds to the Company. PAR Vermont did not pay dividends to the Company in 2023.

In December 2024, Pacific Global Asset Management LLC (PGAM), a wholly owned subsidiary of the Company, paid a \$21 million dividend in the form of cash to the Company. In 2023, PGAM paid a \$40 million dividend in the form of cash to the Company.

C. The Company did not have transactions with related parties that are not reported on Schedule Y.

D. As of December 31, 2024 and 2023, the Company reported \$0.2 million and \$7 million, respectively, as amounts due from the parent company and the ultimate parent, Pacific LifeCorp and Pacific Mutual Holding Company (PMHC), and \$338 million and \$75 million, respectively, due from other affiliated companies. As of December 31, 2024 and 2023, the Company reported \$0 and \$2 million, respectively, as amount due to other affiliated companies. It is the Company's practice to settle these amounts no later than 90 days after the due date.

The Company has an agreement with PL&A to lend up to \$100 million at a variable interest rate. There was no amount outstanding as of December 31, 2024. The Company also has an intercompany uncommitted revolving credit facility with affiliates to lend or borrow funds. Under the agreement, the Company can lend or borrow up to 3% of the Company's admitted assets to certain affiliates as of the preceding December 31. The aggregate total borrowing of all outstanding loans is limited to \$1.0 billion including any outstanding loans under other affiliate lending agreements. As of December 31, 2024, the amount outstanding under the facility was \$200 million at an interest rate of 4.71% which is reported in receivables from parent, subsidiaries and affiliates.

In June 2022, the Company entered into a promissory note with Pacific LifeCorp to borrow up to \$200 million at a variable interest rate. There were no borrowings outstanding as of December 31, 2024. The promissory note matures on March 31, 2025.

In connection with the operations of certain subsidiaries, the Company has made commitments to provide for additional capital funding as may be required. Refer to Schedule Y - Part 2 for additional details.

E. The Company provides investment and administrative services for certain subsidiaries and affiliates under administrative services agreements.

Effective March 2024, PL&A provides certain administrative and special services to the Company under an administrative service agreement.

In December 1993, the Company issued Contribution Certificates, also referred to as surplus notes (1993 Surplus Notes) in the principal amount of \$150 million for net cash proceeds of approximately \$147 million at an interest rate of 7.90%. Interest was payable semiannually on June 30 and December 30. The Company had entered into interest rate swaps converting these surplus notes to variable rate notes based upon the London Interbank Offered Rate (LIBOR). During the year ended December 31, 2011, the interest rate swaps were terminated. Deferred gains related to the termination of the interest rate swaps were recorded directly to surplus in “aggregate write-ins for other than special surplus funds” and are amortized as a reduction of interest expense over the life of the surplus notes using the effective interest method. As of December 31, 2024, total unamortized gains were \$0. Amortization totaled \$0 and \$5 million for the years ended December 31, 2024 and 2023, respectively.

The 1993 Surplus Notes were issued pursuant to Rule 144A under the Securities Act of 1933, underwritten by Merrill Lynch & Co., Goldman Sachs & Co., and J.P. Morgan Securities, Inc., and were administered by JPMorgan Chase Bank.

In December 2023, with the approval of the NE DOI, the Company repaid the full \$134 million of the 1993 Surplus Notes.

NOTES TO FINANCIAL STATEMENTS

In June 2009, the Company issued \$1.0 billion of surplus notes at a fixed interest rate of 9.25%, maturing in June 2039 (2009 Surplus Notes). Interest is payable semiannually on June 15 and December 15. The Company may redeem all or a portion of the 2009 Surplus Notes at its option, subject to the prior approval of the Director of the NE DOI for such optional redemption. The 2009 Surplus Notes are unsecured and subordinated to all present and future senior indebtedness and policy claims of the Company. Each payment of interest on and the repayment of principal of the 2009 Surplus Notes may be made only out of the Company’s surplus and with the prior approval of the Director of the NE DOI. The Company had entered into interest rate swaps converting these surplus notes to variable rate notes based upon the LIBOR. During the year ended December 31, 2011, the interest rate swaps were terminated. Deferred gains related to the termination of the interest rate swaps were recorded directly to surplus in “aggregate write-ins for other than special surplus funds” and are amortized as a reduction of interest expense over the life of the surplus notes using the effective interest method. As of December 31, 2024, total unamortized gains were \$80 million. Amortization totaled \$3 million for the years ended December 31, 2024 and 2023.

The 2009 Surplus Notes were issued pursuant to Rule 144A under the Securities Act of 1933, underwritten by Goldman Sachs & Co., UBS Investment Bank and Wachovia Securities. U.S. Bank has been appointed as fiscal agent to act as registrar, principal paying agent and transfer agent with respect to the 2009 Surplus Notes. The 2009 Surplus Notes are held by bank custodians for unaffiliated investors and may hold 10% or more of the outstanding notes at any time.

In September 2022, with the approval of the Director of the NE DOI, the Company repurchased and retired \$85 million of the 2009 Surplus Notes.

In January 2013, the Company issued a \$500 million, 30-year surplus note to its parent, Pacific LifeCorp, at a fixed interest rate of 5.125%, with semi-annual interest payments due January 25 and July 25, maturing in January 2043 (2013 Surplus Note). Each payment of interest on and the repayment of principal of the 2013 Surplus Notes may be made only out of the Company’s surplus and with the prior approval of the Director of the NE DOI. The 2013 Surplus Note is unsecured and subordinated to all present and future senior indebtedness and policy claims of the Company.

In October 2017, with the approval of the Director of the NE DOI, the Company issued \$750 million of 4.3% surplus notes maturing in October 2067 (2017 Surplus Notes). The 2017 Surplus Notes accrue interest at a fixed rate of 4.3% through October 23, 2047, and thereafter until maturity at a floating rate equal to the three-month LIBOR for deposits in U.S. dollars plus 2.796%. The loan agreement contains fallback language in the event LIBOR becomes unavailable. Interest is payable semiannually on April 24 and October 24 until and including October of 2047, and thereafter quarterly on January 24, April 24, July 24 and October 24 of each year, commencing on January 24, 2048. The 2017 Surplus Notes were issued pursuant to Rule 144A under the Securities Act of 1993, underwritten by Barclays, Citigroup, Credit Suisse, Wells Fargo Securities and Goldman Sachs & Co. LLC. The Company may redeem all or a portion of the 2017 Surplus Notes at its option any time on or after October 2047 at the redemption price described under the terms of the 2017 Surplus Notes subject to the prior approval of the Director of the NE DOI for such optional redemption. Each payment of interest on and the repayment of principal of the 2017 Surplus Notes may be made only out of the Company’s surplus and with the prior approval of the Director of the NE DOI. The 2017 Surplus Notes are held by bank custodians for unaffiliated investors and may hold 10% or more of the outstanding notes at any time. NOTES TO FINANCIAL STATEMENTS

B. Assessments

1. The Company is required by law to participate in the guaranty associations of the various states in which it is licensed to do business. The state guaranty associations ensure payments of guaranteed benefits, with certain restrictions, to policyholders of impaired or insolvent insurance companies by assessing all other companies operating in similar lines of business. The Company has not received notification of any insolvency that is expected to result in a material guaranty fund assessment.

The Company has a liability for estimated guaranty fund assessments and a related premium tax asset. As of December 31, 2024 and 2023, the estimated liability was \$9 million and \$4 million, respectively. As of December 31, 2024 and 2023, the related premium tax asset was \$36 million and \$3 million, respectively. These amounts represent management’s best estimate based on information received from the state in which the Company writes business and may change due to many factors including the Company’s share of the ultimate cost of current insolvencies. Future guaranty fund assessments are expected to be paid based on anticipated funding periods for each guaranty association obligation. Premium tax offsets are expected to be realized based on regulations set forth by various state taxing authorities.

2. Assets from Paid and Accrued Premium Tax Offset Rollforward

	December 31, 2024
a. Assets Recognized from Paid and Accrued Premium Tax Offsets and Policy Surcharges Prior Year-end	\$2,902,875
b. Decreases Current Year:	
Premium Tax Offsets Applied	(144,627)

c. Increases Current Year:	
Guaranty Fund Assessments Paid	28,009,008
d. Assets Recognized from Paid and Accrued Premium Tax Offsets and Policy Surcharges Current Year-end	\$35,667,256

3. The Company does not have guaranty fund liabilities and assets related to assessments from insolvencies of entities that wrote long-term care contracts.

C. The Company did not recognize any gain contingencies.

D. The Company did not have claims related extra contractual obligations or bad faith losses stemming from lawsuits.

E. The Company did not have joint and several liability arrangements accounted for under SSAP No. 5, *Liabilities, Contingencies and Impairments of Assets*.

F. All Other Contingencies

The Company is a respondent in a number of legal proceedings, some of which involve allegations for extra-contractual damages. Although the Company is confident of its position in these matters, success is not a certainty and a judge or jury could rule against the Company. In the opinion of management, the outcome of such proceedings is not likely to have a material adverse effect on the Company's financial statements. The Company believes adequate provision has been made in its financial statements for all probable and reasonably estimable losses for litigation claims against the Company, if any.

In 2007, the Internal Revenue Service (IRS) issued Rev. Rul. 2007-54, interpreting then-current tax law regarding the computation of the DRD. Later in 2007, the IRS issued Rev. Rul. 2007-61, suspending Rev. Rul. 2007-54 and indicating that the IRS would re-address this issue in a future regulation project. In 2014, the IRS issued Rev. Rul. 2014-7, stating that it would not address this issue through regulation, but instead would defer to legislative action. Rev. Rul. 2014-7 also expressly superseded Rev. Rul. 2007-54, and declared Rev. Rul. 2007-61 obsolete. With the enactment the Act on December 22, 2017, DRD computations have been modified effective January 1, 2018. Therefore, the Company does not expect that any of the rulings described above will affect DRD computations in the future. However, in open tax years before 2018, the Company could still lose a substantial portion of its DRD claims, which could in turn have a material adverse effect on the Company's financial statements.

In the course of its business, the Company provides certain indemnifications related to dispositions, acquisitions, investments, lease agreements or other transactions that are triggered by, among other things, breaches of representations, warranties or covenants provided by the Company. These obligations are typically subject to time limitations that vary in duration, including contractual limitations and those that arise by operation of law, such as applicable statutes of limitation. Because the amounts of these types of indemnifications often are not explicitly stated, the overall maximum amount of the obligation under such indemnifications cannot be reasonably estimated. The Company has not historically made material payments for these types of indemnifications. The estimated maximum potential amount of future payments under these obligations is not determinable due to the lack of a stated maximum liability for certain matters, and therefore, the Company may record a contingent reserve for such matters. Management believes that Company liabilities related to such matters are not likely to have a material adverse effect on the Company's financial statements.

The Company issues synthetic guaranteed interest contracts to Employee Retirement Income Security Act of 1974 (ERISA) qualified defined contribution employee benefit plans and 529 plans. The plan uses the contract in its stable value fixed income option. The Company receives a fee for providing book value accounting for the plan’s stable value fixed income option. In the event that plan participant elections exceed the fair value of the assets or if the contract is terminated and at the end of the termination period the book value under the contract exceeds the fair value of the assets, then the Company is required to pay the plan the difference between book value and fair value. The Company mitigates the investment risk through pre-approval and compliance monitoring of the investment guidelines, and contractual provisions including the credited rate reset formula that reflects the actual investment and cash flow experience of the underlying plan.

16. INFORMATION ABOUT FINANCIAL INSTRUMENTS WITH OFF-BALANCE-SHEET RISK AND FINANCIAL INSTRUMENTS WITH CONCENTRATIONS OF CREDIT RISK

- 1. The table below summarizes the face (notional) amount of the Company’s financial instruments with off-balance-sheet risk.

	Assets		Liabilities	
	December 31, 2024	December 31, 2023	December 31, 2024	December 31, 2023
a. Swaps	\$19,959,551,588	\$18,261,074,548	\$0	\$0
b. Futures	2,135,188,063	3,128,885,746	0	0
c. Options	69,335,027,576	26,852,718,167	0	0
d. Total	<u>\$91,429,767,227</u>	<u>\$48,242,678,461</u>	<u>\$0</u>	<u>\$0</u>

See Schedule DB for additional detail.

- 2. The notional amount of a derivative does not represent an amount that must be paid or received in the future, except in the case of currency swaps. However, such amounts do provide an indication of their potential sensitivity to interest rates, equity indices or currencies, as applicable. The market sensitivity of a derivative would approach that of a cash instrument having a face amount equal to the derivative's notional amount. Included in the table above is the notional for all derivative positions whether designated as a hedge or not. See Notes 1.C. and 8. for the accounting policies for derivative transactions and discussion of credit and market risk.
- 3. The Company is exposed to credit-related losses in the event of nonperformance by derivative counterparties to OTC derivatives. The Company manages its credit risk by dealing with creditworthy counterparties, establishing risk-control limits, executing legally enforceable master netting agreements, and obtaining collateral where appropriate. In addition, the Company evaluates the financial stability of each counterparty before entering into each agreement and throughout the period that the financial instrument is owned.

The Company’s credit exposure is measured on a counterparty basis as the net positive fair value of all derivative positions with the counterparty, net of income or expense accruals and collateral received. All of the net credit exposure for the Company from derivative contracts is with investment-grade counterparties. The Company has not incurred any losses on derivative financial instruments due to counterparty nonperformance for the years ended December 31, 2024 and 2023. The Company does not expect any counterparties to fail to meet their obligations given their investment-grade ratings.

The Company’s OTC-cleared derivatives are effected through central clearing counterparties and its exchange-traded derivatives are effected through regulated exchanges. Such positions are marked to market and margined on a daily basis (both initial margin and variation margin), and the Company has minimal exposure to credit-related losses in the event of nonperformance by counterparties to such derivatives.

NOTES TO FINANCIAL STATEMENTS

4. For OTC derivative transactions, the Company enters into legally enforceable master netting agreements which provide for the netting of payments and receipts with a single counterparty. The net position with each counterparty is calculated as the aggregate fair value of all derivative instruments with each counterparty, net of income or expense accruals and collateral paid or received. These master netting agreements include collateral arrangements with derivative counterparties, which require positions be marked to market and margined on a daily basis by the daily settlement of variation margin. The Company has minimal counterparty exposure to credit-related losses in the event of nonperformance by these counterparties.

The OTC agreements may include a termination event clause associated with financial strength ratings assigned by certain independent rating agencies. If these financial strength ratings were to fall below a specified level, as defined within each counterparty master agreement, or if one of the rating agencies were to cease to provide a financial strength rating, the counterparty could terminate the master agreement with payment due based on the net fair value of the underlying derivatives. As of December 31, 2024 and 2023, the Company’s financial strength ratings were above the specified level.

20. FAIR VALUE MEASUREMENTS

A. The Company's financial assets and liabilities that are carried at fair value have been classified, for disclosure purposes, based on a hierarchy defined by SSAP No. 100, *Fair Value*. The determination of fair value requires the use of observable market data when available. The hierarchy consists of the following three levels that are prioritized based on observable and unobservable inputs.

Level 1: Unadjusted quoted prices for identical instruments in active markets. Level 1 financial instruments include securities that are traded in an active exchange market.

Level 2: Observable inputs other than Level 1 prices, such as quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in inactive markets, and model-derived valuations for which all significant inputs are observable market data.

Level 3: Valuations derived from valuation techniques in which one or more significant inputs are not market observable.

Investments reported at Net Asset Value (NAV) are not captured within the fair value hierarchy, but are separately identified in the table below.

1. Fair Value Measurements of Financial Assets and Liabilities Carried at Fair Value or NAV as of December 31, 2024:

NOTES TO FINANCIAL STATEMENTS

4. The fair values of bonds, residual tranches (reported in Other Invested Assets), preferred stocks and common stocks are determined by management after considering external pricing sources and internal valuation techniques. For securities with sufficient trading volume, prices are obtained from third-party pricing services. For securities that are traded infrequently, fair values are determined after evaluating prices obtained from third-party pricing services and independent brokers or are valued internally using various valuation techniques.

The Company's management analyzes and evaluates prices received from independent third parties and determines whether they are reasonable estimates of fair value. Management's analysis may include, but is not limited to, review of third-party pricing methodologies and inputs, analysis of recent trades, comparison to prices received from other third parties and development of internal models utilizing observable market data of comparable securities. The Company assesses the reasonableness of valuations received from independent brokers by considering current market dynamics and current pricing for similar securities.

For prices received from independent pricing services, the Company applies a formal process to challenge any prices received that are not considered representative of fair value. If prices received from independent pricing services are not considered reflective of market activity or representative of fair value, independent non-binding broker quotations are obtained or an internally developed valuation is prepared. Upon evaluation, the Company determines which source represents the best estimate of fair value. Overrides of third-party prices to internally developed valuations of fair value did not produce material differences in the fair values for the majority of the portfolio; accordingly, overrides were not material. In the absence of such market observable activity, management's best estimate is used.

Fair values determined by internally derived valuation tools use market-observable data if available. Generally, this includes using an actively traded comparable security as a benchmark for pricing. These internal valuation methods primarily represent discounted cash flow models that incorporate significant assumptive inputs such as spreads, discount rates, default rates, severity and prepayment speeds. These inputs are analyzed by the Company's portfolio managers and analysts, investment accountants and risk managers. Internally developed estimates may also use unobservable data, which reflect the Company's own assumptions about the inputs market participants would use.

Most securities priced by a major independent third-party service have been classified as Level 2, as management has verified that the significant inputs used in determining their fair values are market observable and appropriate. Externally priced securities for which fair value measurement inputs are not sufficiently transparent, such as securities valued based on broker quotations, have been classified as Level 3. Internally valued securities, including adjusted prices received from independent third parties, where significant management assumptions have been utilized in determining fair value, have been classified as Level 3. Securities categorized as Level 1 consist primarily of investments in mutual funds.

The Company applies controls over the valuation process. Prices are reviewed and approved by the Company's professional credit analysts that have industry expertise and considerable knowledge of the issuers. Management performs validation checks to determine the completeness and reasonableness of the pricing information, which include, but are not limited to, changes from identified pricing sources, significant or unusual price fluctuations above predetermined tolerance levels from the prior period, and back-testing of fair values against prices of actual trades. A group comprised of the Company's investment accountants, portfolio managers and analysts and risk managers communicate on any unusual items above the tolerance levels that may have been identified in the pricing review process. These items are investigated, further analysis is performed and resolutions are appropriately documented.

Derivative instruments are reported at fair value using pricing valuation models which utilize market data inputs or independent broker quotations or exchange prices for exchange-traded futures. The Company calculates the fair value of derivatives using market standard valuation methodologies for foreign currency swaps, interest rate swaps, equity options and equity total return swaps. The derivatives are valued using mid-market inputs that are predominantly observable in the market. Inputs include, but are not limited to, interest swap rates, foreign currency forward and spot rates, credit spreads and correlations, interest volatility, equity volatility and equity index levels. The Company values for certain derivatives that are designated as cash flow hedges in the same manner as the hedged item, which are determined using pricing models with inputs that are observable in the market or can be derived principally from or corroborated by observable market data. On a monthly basis, the Company performs an analysis of derivative valuations, which includes both quantitative and qualitative analyses. Examples of procedures performed include, but are not limited to, review of pricing statistics and trends, analysis of the impacts of changes in the market environment and review of changes in the market value for each derivative by both risk managers and investment accountants. Internally calculated fair values are reviewed and compared to external broker fair values for reasonableness.

Derivative instruments classified as Level 1 are exchange-traded. Derivative instruments classified as Level 2 primarily include foreign currency and interest rate swaps. The derivative valuations are determined using pricing models with inputs that are observable in the market or can be derived principally from or corroborated by observable market data, primarily interest swap rates, interest rate volatility and foreign currency forward and spot rates.

Derivative instruments classified as Level 3 include complex derivatives, such as equity options and total return swaps. These derivatives are valued using pricing models which utilize both observable and unobservable inputs, primarily interest rate volatility, equity volatility, equity index levels and, to a lesser extent, broker quotations. A derivative instrument containing Level 2 inputs would be classified as a Level 3 financial instrument in its entirety if it has at least one significant Level 3 input.

The fair value of separate account assets is based on the fair value or NAV of the underlying assets. Separate account assets held at fair value primarily consist of investments in mutual funds and hedge funds.

Level 1 separate account assets include mutual funds that are valued based on reported net asset values provided by fund managers daily and can be redeemed without restriction. Management performs validation checks to determine the reasonableness of the pricing information, which include, but are not limited to, price fluctuations above predetermined thresholds from the prior day and validation against similar funds or indices. Variances are investigated, further analysis is performed and resolutions are appropriately documented.

NOTES TO FINANCIAL STATEMENTS

B. Disclosure of Fair Value of Financial Instruments:

The following methods and assumptions were used to estimate the fair value of these financial instruments as of December 31, 2024:

Mortgage Loans: The fair value of the mortgage loan portfolio is determined by discounting the estimated future cash flows, using current rates that are applicable to similar credit quality, property type and average maturity of the composite portfolio.

Cash, Cash Equivalents and Short-Term Investments (including Securities Lending Reinvested Collateral Assets): For cash and cash equivalents with maturities of three months or less from date of purchase, their fair values approximate their book/adjusted carrying values due to their short maturities. For short-term investments with maturities of one year or less from date of purchase, excluding cash equivalents and money market mutual funds, their fair values are determined using similar valuation techniques as described above for bonds. Cash equivalents that are money market mutual funds have fair values that approximate their book/adjusted carrying values due to the short maturities of the underlying investments of the funds. Securities lending reinvested collateral assets that are primarily reverse purchase agreements have fair values that approximate their book/adjusted carrying values due to their short maturities.

Contract Loans: Contract loans are not separable from their associated insurance contract and bear no credit risk since they do not exceed the contract's cash surrender value, making these assets fully secured by the cash surrender value of the contracts. Therefore, the carrying amount of the contract loans is a reasonable approximation of fair value.

Other Invested Assets: Other invested assets consist primarily of surplus note investments held from other insurance providers and WCFIs that are NAIC rated 1 or 2. The fair values of the surplus note investments are priced by an independent pricing service as described for bonds above. The WCFIs are held at accreted book value which approximates fair value due to the short-term nature of the investment.

Separate Account Assets: The fair value of assets in the Separate Accounts in Level 2 consists of bonds based on the valuation methods described in Note 20 A.4. above. The fair value of assets in the Separate Accounts in Level 3 consists of bonds based on valuation methods described in Note 20 A.4. above and mortgage loans based on the valuation method described above.

Liability for Deposit-Type Contracts: The primary methods used to determine the fair value of liability for deposit-type contracts are: discounted cash flow methodologies using significant unobservable inputs, discounted cash flow methodologies using current market risk-free interest rates and adding a spread to reflect nonperformance risk and the use of observable inputs, such as quoted prices for identical or similar instruments from third-party pricing services. The fair value of deposit-type contracts issued at floating rates or that are short-term in nature approximate their carrying value.

Separate Account Liability for Deposit-Type Contracts: The statement value of separate account liability for deposit-type contracts is reported under separate account liabilities and is a reasonable estimate of their fair value because the contractual interest rates are variable and based on current market rates.

(2) Excludes investments accounted for under the equity method

(3) Excludes deposit liabilities with no defined or contractual maturities

D. The Company had no investments where it was not practicable to estimate fair value.

E. Investments Measured Using the NAV Practical Expedient:

Separate account assets include hedge funds where the fair value is based on the NAV obtained from the fund managers. Investment strategies related to separate account hedge funds include multi-strategy primarily invested in U.S. and international equity, fixed income, long/short equity, loans, precious metals, real estate, derivatives, privately held companies and private partnerships. The redemption frequency can be daily, monthly, quarterly, semi-annually or annually. The remaining lockup period ranges from zero to 35 months as of December 31, 2024. There are no unfunded commitments of investments measured using the NAV practical expedient as of December 31, 2024.

NOTES TO FINANCIAL STATEMENTS

21. OTHER ITEMS

- A. The Company did not have any unusual or infrequent items.
- B. The Company did not have troubled debt restructuring during 2024.
- C. Other Disclosures

The Company is the owner and beneficiary of life insurance policies captured under SSAP No. 21, *Other Admitted Assets*, included in Page 2, Line 25 - Aggregate write-ins for other than invested assets at their cash surrender values. See Note 21.I.

As of December 31, 2024, the Company had \$1.5 billion and \$25 million of outstanding contractual obligations to acquire private placement securities for the General Account and Separate Account, respectively. As of December 31, 2024, the Company had \$3.1 billion and \$8 million of outstanding mortgage loan commitments in the General Account and Separate Account, respectively, which were primarily advances available for construction loans.

The Company recognized in net investment income prepayment income of \$4 million from early pay off mortgage loans.

- D. The Company did not have any business interruption insurance recoveries.
- E. The Company did not have unused state tax credits.
- F. Subprime-Mortgage-Related Risk Exposure:
 - 1. Subprime mortgage lending is the origination of residential mortgage loans to customers with weak credit profiles. Alt-A mortgage lending is the origination of residential mortgage loans to customers who have good credit ratings, but have limited documentation for their source of income or some other standard input used to underwrite the mortgage loan. The greater use of affordable mortgage products and relaxed underwriting standards by some originators for these loans led to higher delinquency and loss rates, especially within the 2007 and 2006 vintage years.

The Company has exposure to subprime and Alt-A residential loans through direct purchases of residential mortgage-backed securities (RMBS). The Company manages the exposure to subprime securities by purchasing highly rated tranches with significant subordination and focusing on underlying collateral with vintage years of 2005 and prior. Exposure to Alt-A securities is managed by investing in super senior and senior tranches with significant subordination. These securities were highly rated at purchase.
 - 2. The Company did not have direct exposure to subprime mortgage loans.

22. EVENTS SUBSEQUENT

The Company has evaluated events subsequent to December 31, 2024 and through February 28, 2025, the date this Annual Statement was filed, and has concluded that no events have occurred that required adjustment to this Annual Statement. The Company has not evaluated subsequent events after the filing date.

23. REINSURANCE

The Company cedes certain statutory reserves to affiliated special purpose financial insurance companies and affiliated captive reinsurance companies that are supported by a combination of cash, invested and other assets and third-party excess of loss reinsurance agreement or note facilities. As of December 31, 2024, the Company's total statutory reserve credit was \$3.9 billion, which was partially supported by third-party excess of loss reinsurance agreement and note facilities, as described below.

The Company utilizes affiliated reinsurers to mitigate the statutory capital impact of NAIC Model Regulation "Valuation of Life Insurance Policies" (Regulation XXX) and NAIC Actuarial Guideline 38 on the Company's universal life products with flexible duration no lapse guarantee rider (FDNLGR) benefits. PAR Vermont and PBRC are Vermont based special purpose financial insurance companies subject to regulatory supervision by the Vermont Department of Financial Regulation. PAR Vermont and PBRC are wholly-owned subsidiaries of the Company and accredited authorized reinsurers in Nebraska. The Company cedes certain level term life insurance to PBRC and FDNLGR benefits to PAR Vermont and PBRC. Economic reserves, as defined in the PAR Vermont and PBRC reinsurance agreements, are supported by cash and invested and other assets, including funds withheld at the Company.

The Company has reinsurance agreements with RGBM, a wholly-owned, indirect subsidiary of Pacific LifeCorp domiciled in Bermuda, through which the Company retrocedes statutory reserves for a majority of the underlying Yearly Renewable Term (YRT) treaties on a 100% coinsurance basis to RGBM.

Effective September 2024, the Company entered into a coinsurance with funds withheld agreement to cede certain Group Annuities to RGBM, recognized as a Reciprocal Jurisdiction Reinsurer in Nebraska. As of December 31, 2024, the Company recognized a reserve credit of \$1.0 billion. The transaction generated a gain, net of tax, of \$134 million which was reported in Surplus (line 53) and will be recognized in future periods as earnings emerge from the business reinsured in accordance with NAIC SAP Appendix A-791.

The Company has assumed reinsurance agreements with affiliated reinsurer Pacific Life Re International Limited UK Branch (RIBM UK) through which the Company provides two longevity reinsurance solutions associated with individual annuities and pension schemes. Reserves assumed through this agreement totaled \$2.0 billion as of December 31, 2024.

Effective January 2024, an amendment was made to the existing in-force longevity treaties between the Company and RIBM UK. The Company increased the quota share assumed under the treaties and paid a ceding commission of \$221 million to RIBM UK due to this transaction.

In December 2024, a retrocession treaty between the Company and RIBM UK was terminated. As of December 31, 2024, the Company derecognized \$568 million of reserves and recognized a gain, net of tax, of \$5 million.

During 2024, RIBM UK terminated certain assumed longevity reinsurance agreements in exchange for cash consideration of \$81 million. This consideration was retroceded fully to the Company as part of the retrocession arrangement between RIBM UK and the Company.

On September 15, 2023, the Company signed an indemnity reinsurance agreement with Hannover Life Reassurance Company of America (Bermuda) LTD to cede risks under certain indexed universal life insurance policies issued by the Company, effective December 31, 2023. The reinsurance is on a coinsurance basis in respect of the Coinsurance Benefits under the Coinsured Policies and on a YRT basis in respect of the YRT Benefits under the YRT Reinsured Policies. The Company recognized a reserve credit of \$12.2 billion as of December 31, 2024.

The Company had ceded and assumed reinsurance contracts in place with Scottish Re (U.S.), Inc. (Scottish Re), a reinsurer whose financial stability deteriorated. In March 2019, Scottish Re's domiciliary state regulator issued a rehabilitation and injunction order, in which the regulator shall conduct and continue business of the reinsurer. In July 2023, the court granted a liquidation order for Scottish Re, which terminated the reinsurance contracts as of September 30, 2023.

The Company performed an impairment analysis utilizing information regarding Scottish Re's financial condition to estimate the collectability of the reinsurance recoverables and recorded an immaterial impairment in the Summary of Operations in the year 2020 and 2021. For the year ended December 31, 2023, certain amounts were reclassified from a Change in Non-Admitted Asset to an impairment recorded in the Summary of Operations, which had a net zero impact on Capital and Surplus. As of December 31, 2024, timing of expected settlements of the reinsurance recoverables is not certain. The Company does not expect the financial deterioration of the reinsurer to have a material adverse effect on the Company's financial statements as of December 31, 2024.

Scottish Re's reinsurance recoverable amounts from paid claims incurred prior to the reinsurance contract cancellation and which are not in dispute reported on page 2, line 16.1 – Amounts Recoverable from Reinsurers were \$15 million, which were admitted.

Total amounts recoverable from Scottish Re's estate for claims incurred before the reinsurance contract cancellation and unpaid as of year-end reported on page 2, line 16.3 – Other Amounts Receivable Under Reinsurance Contracts of \$1 million were non-admitted.

Total other amounts expected to be recovered from Scottish Re's estate reported on page 2, line 25 – Aggregate write-ins for Other than Invested Assets of \$9 million were non-admitted.

Amounts the Company owes to Scottish Re's estate were reported on page 3, line 4.1 – Contract claims - Life of \$61 million and as a reduction to page 2, line 15.1 – Uncollected premiums and agents balances in course of collection of \$15 million.

NOTES TO FINANCIAL STATEMENTS

35. SEPARATE ACCOUNTS

A. Separate Account Activity

1. The Company utilizes an insulated Separate Account to record and account for assets and liabilities related to variable annuities, variable universal life and group annuities. The liabilities consist of reserves established to meet withdrawal and future benefit payment contractual provisions. Investment risk associated with market value changes are generally borne by the contract holders, except to the extent of the minimum guarantees made by the Company with respect to certain Separate Accounts.

In addition, the Company has a non-insulated Separate Account for registered index-linked annuities.

2. In accordance with the products recorded within the Separate Accounts, some assets are considered legally insulated whereas others are not legally insulated from the General Account. The legal insulation of the separate account assets prevents such assets from being generally available to satisfy claims resulting from the General Account.

As of December 31, 2024 and December 31, 2023, the Company’s Separate Account statement included legally insulated assets of \$72.1 billion and \$65.6 billion, respectively. The assets legally insulated and not legally insulated from the General Account as of December 31, 2024 are attributed to the following products:

Product	Legally Insulated Assets	Separate Account Assets (Not Legally Insulated)
Variable Annuities	\$49,643,297,552	\$0
Variable Universal Life	14,396,182,104	0
Group Annuities	8,074,972,581	0
Registered Index-Linked Annuities	0	0
Total	<u>\$72,114,452,238</u>	<u>\$0</u>

3. In accordance with the products recorded within the Separate Account, some separate account liabilities are guaranteed by the General Account. In accordance with guarantees provided, if the investment proceeds are insufficient to cover the rate of return guaranteed for the product, the policyholder proceeds will be remitted by the General Account.

To compensate the General Account for the risk taken, the Separate Account paid risk charges as follows for the year ended December 31, 2024 and for the prior four years:

a.	2024	\$346,894,284
b.	2023	\$355,145,665
c.	2022	\$352,035,457
d.	2021	\$347,294,619
e.	2020	\$299,960,404

As of December 31, 2024, the General Account of the Company had paid \$15 million toward the Separate Account guarantees. Payments for the preceding four years ended December 31, 2023, 2022, 2021 and 2020 these amounts were \$31 million, \$35 million, \$10 million and \$15 million, respectively.

4. The Company does not engage in securities lending transactions within the Separate Account.

NOTES TO FINANCIAL STATEMENTS

B. General Nature and Characteristics of Separate Accounts Business:

The Company has Separate Accounts with guarantees comprised of the group annuities business where the General Account guarantees annuity payments if the Separate Account is unable to do so. Assets of the group annuities business are carried at amortized cost and the Company establishes an AVR as required. The Company's Separate Accounts without guarantees consist of the variable annuities and variable universal life businesses, with assets carried at fair value, and registered index-linked annuities, with assets carried at fair value and amortized cost.
