⁶ Assumes point-to-point measurements starting December 15 and ending December 15 for each 1-year or 5-year period. Some of the indexed accounts did not exist during all of the represented time period, therefore, data for time periods prior to the index inception date is hypothetical and is provided for informational purposes only to indicate hypothetical crediting rates had the index been available over the relevant time period. Hypothetical data results are based on current crediting assumptions applied retroactively. The actual historical growth cap, participation rate and floor crediting assumptions of the indexed accounts, had they been available, over the period analyzed might have been higher or lower than assumed, and likely would have fluctuated with market conditions, subject to product guarantees.
