# CLEARBRIDGE VARIABLE AGGRESSIVE GROWTH PORTFOLIO

---

The Securities and Exchange Commission has adopted new regulations that will result in changes to the design and delivery of annual and semi-annual shareholder reports beginning in July 2024.

If you have previously elected to receive shareholder reports electronically, you will continue to do so and need not take any action.

Otherwise, paper copies of the Fund's shareholder reports will be mailed to you beginning in July 2024. If you would like to receive shareholder reports and other communications from the Fund electronically instead of by mail, you may make that request at any time by contacting your insurance company or your financial intermediary (such as a broker-dealer or bank).

# Portfolio overview

## Q. What is the Portfolio's investment strategy?

**A.** The Portfolio seeks capital appreciation. The Portfolio invests primarily in common stocks of companies that we believe are experiencing, or will experience, growth in earnings that exceeds the average rate of earnings growth of the companies which comprise the S&P 500 Index<sup>i</sup>. The Portfolio may invest in the securities of large, well-known companies offering prospects of long-term earnings growth. However, because higher earnings growth rates are often achieved by small to medium capitalization companies, a significant portion of the Portfolio's assets may be invested in the securities of such companies. The Portfolio may invest up to 25% of its net assets (at the time of investment) in equity securities of foreign issuers.

We emphasize individual security selection while diversifying the Portfolio's investments across industries, which may help to reduce risk. We focus primarily, but not exclusively, on emerging growth companies that have passed their "start-up" phase and show positive earnings and the prospect of achieving significant profit gains in the two to three years after the Portfolio acquires their stocks.

## Q. What were the overall market conditions during the Portfolio's reporting period?

**A.** Equities delivered positive returns during the twelve-month reporting period ended December 31, 2023, with the broad market S&P 500 Index advancing 26.29%. The benchmark Russell 3000 Growth Index<sup>ii</sup> surged 41.21%, outperforming the Russell 3000 Value Index<sup>iii</sup> (+11.66%) by over 2,900 basis points. Resilient corporate earnings among mega cap growth stocks and investor enthusiasm about the potential for artificial intelligence ("AI") led to outsized returns by the information technology ("IT") (+63.96%) and communication services (+63.80%) sectors. The lagged effects of interest rate hikes by the Federal Reserve Board (the "Fed") to tame inflation drove 10-year U.S. Treasury yields as high as 5% during the fourth quarter before finishing at 3.88% weighed on income-oriented sectors such as utilities (+0.48%) and consumer staples (+3.40%). The health care sector (+12.60%) was also out of favor due to rising health care system costs from increased utilization post-pandemic and fears that GLP-1 medications for diabetes and obesity could negatively impact other therapeutic areas.

Initial signs of progress in the Fed's efforts to tame generationally high inflation supported equities in the first quarter of 2023, with strong performance among defensive and cyclical<sup>1</sup> stocks. Stocks rose in the second quarter of 2023 as investors took cooling inflation to mean the Fed's tightening cycle was nearing its conclusion. Simultaneously, enthusiasm grew over the potential applications and benefits of AI. The result was positive overall market performance with gains particularly concentrated in a handful of mega cap companies in the IT, consumer discretionary and communication services sectors.

<sup>1</sup> Cyclical consists of the following industries: automotive, entertainment, gaming, home construction, lodging, retailers, restaurants, textiles and other consumer services.

## Portfolio overview (cont'd)

Market leadership began to broaden during the third quarter of 2023 as better-than-expected corporate earnings and cooling inflation created a growing chorus for a soft landing for the economy. This helped provide a bid to smaller and more economically sensitive stocks on the hopes that the Fed would reach its rate hike zenith, or even reduce rates, before the end of the year. However, as the quarter wore on, stubborn inflationary data, continued economic resiliency and surging U.S. Treasury yields pushed out rate cut expectations further into the future.

In the fourth quarter of 2023, signs of cooling inflation, a slowing labor market and favorable U.S. Treasury auction volumes caused bond yields to plummet, providing a strong bid to equities across the market with growth resuming its leadership position. Indications from the Fed in December that its tightening cycle was over and that rate cuts were likely in the first half of 2024 added further fuel to the rally.

### **Q. How did we respond to these changing market conditions?**

**A.** The Portfolio produced solid gains for the reporting period but meaningfully underperformed the Portfolio's benchmark index in one of the narrowest markets in decades. We attribute these results to the Portfolio's focus on delivering performance from growth companies in the \$10 billion to \$100 billion market cap range rather than the mega-caps that dominated for the period.

While disappointed with the Portfolio's results on a relative basis, they did not deter from our mission of continuing to improve the balance and growth profile of the Portfolio. This activity has involved increasing exposure to areas of the market where the portfolio has traditionally been underweight, including the consumer discretionary and industrials sectors, as well as diversifying the Portfolio's exposure in the communication services sector beyond our long-term holdings in traditional media.

Top heavy leadership during the period overshadowed weakness across much of the equity market, enabling us to take advantage of attractive entry points to establish positions in TJX and Starbucks. TJX is the leading off-price apparel and home furnishings retailer known for its TJ Maxx, Marshalls and HomeGoods brands, with 4,800 global locations. We see TJX as a differentiated retailer offering shoppers a combination of value and convenience with continued share gain opportunity against large addressable U.S. markets for apparel and home decor. Starbucks is the leading provider of specialty coffee beverages, operating close to 19,000 global stores primarily in North America, China and Japan. We view Starbucks as a quality compounder with strong free cash flow, operating in a segment and in dayparts that are very much routine-based and habitual, balancing the business's exposure to discretionary spending.

We consolidated our bets in media by exiting AMC Networks, a name where we have a less optimistic outlooks for growth, and adding to existing holding Liberty Media Formula One, which along with the former World Wrestling Entertainment, which merged with UFC to form a new stock, TKO Group, should both benefit from structural growth in media rights,

sponsorship and event-related revenue. The addition of Pinterest, a social media platform for visual discovery which allows users to find ideas and inspiration, also acts to diversify our entertainment media exposure.

While the Portfolio has limited mega-cap exposure, which has been a recent headwind to relative performance, we own several companies that stand to benefit from the explosive growth in generative AI. These holdings play key roles in building out the necessary infrastructure and helping customers leverage capabilities enabled by this emerging technology. New addition Accenture, a business and IT services consultant, will be instrumental in helping enterprises reinvent and modernize their IT architecture for AI. The company recently announced a \$3 billion investment, which includes doubling their data and AI workforce to 80,000 to address this growing opportunity. Meanwhile, the new purchase ServiceNow, a leader in workflow software for IT services and related enterprise functions, should also benefit from AI and IT spending trends focused on efficiency.

We also added to an existing positions in Snowflake that is indexed to AI. Snowflake, a cloud-based data platform company, is well positioned to help enterprises better leverage their own data to get the most out of AI models. Though it is still early days in terms of adoption, Snowflake has seen workloads for data science, machine learning, and AI use cases grow robustly.

Our goal as portfolio managers is to outperform the market over a full three-to-five-year cycle that includes both risk-on environments and episodes of distress. While 2023 has thus far been characterized as risk-on, we know from experience that volatility will return and that strong cash flow generation and market leadership positions we seek in our growth holdings will once again matter. During such turbulent periods, we feel that good companies get better and emerge stronger both competitively and financially.

We continue to de-risk a robust pipeline of investment ideas, waiting for volatility to work in our favor to both create attractive entry points into new growth names and opportunity to further scale newer positions. The portfolio remains balanced across our pyramid of growth with contributions of higher-growth disruptors such as HubSpot and Airbnb and improving growth companies like Johnson Controls International complemented by a foundation of durable compounders centered among longtime holdings Broadcom, Comcast and Vertex Pharmaceuticals.

## Performance review

For the twelve months ended December 31, 2023, Class I shares of ClearBridge Variable Aggressive Growth Portfolio<sup>2</sup> returned 24.43%. The Portfolio's unmanaged benchmark, the Russell 3000 Growth Index, returned 41.21% for the same period.

<sup>2</sup> The Portfolio is an underlying investment option of various variable annuity and variable life insurance products. The Portfolio's performance returns do not reflect the deduction of expenses imposed in connection with investing in variable annuity or variable life insurance contracts, such as administrative fees, account charges and surrender charges, which, if reflected, would reduce the performance of the Portfolio. **Past performance is no guarantee of future results.**

## Portfolio overview (cont'd)

Performance Snapshot as of December 31, 2023 (unaudited)		
	6 months	12 months
ClearBridge Variable Aggressive Growth Portfolio:		
Class I	10.25%	24.43%
Class II	10.14%	24.13%
Russell 3000 Growth Index	10.28%	41.21%

**The performance shown represents past performance. Past performance is no guarantee of future results and current performance may be higher or lower than the performance shown above. Principal value and investment returns will fluctuate and investors' shares, when redeemed, may be worth more or less than their original cost.**

**All share class returns assume the reinvestment of all distributions at net asset value and the deduction of all Portfolio expenses. Performance figures for periods shorter than one year represent cumulative figures and are not annualized.**

**Portfolio performance figures reflect fee waivers and/or expense reimbursements, without which the performance would have been lower.**

### Total Annual Operating Expenses (unaudited)

**As of the Portfolio's current prospectus dated May 1, 2023, the gross total annual fund operating expense ratios for Class I and Class II shares were 0.82% and 1.07%, respectively.**

**Actual expenses may be higher. For example, expenses may be higher than those shown if average net assets decrease. Net assets are more likely to decrease and Portfolio expense ratios are more likely to increase when markets are volatile.**

### Q. What were the leading contributors to performance?

**A.** On an absolute basis, the Portfolio's positions in six of eight sectors in which it was invested (out of eleven sectors in total) contributed positively to performance for the period, led by the IT and communication services sectors.

Relative to the benchmark, overall sector allocation contributed to performance. In particular, underweight allocations to the consumer staples and financials sectors and an overweight to the communication services sector were the primary drivers of returns.

In terms of individual Portfolio holdings, leading contributors to performance for the period included positions in Broadcom, CrowdStrike Holdings and HubSpot in the IT sector, Vertex Pharmaceuticals in the health care sector and Comcast in the communication services sector.

### Q. What were the leading detractors from performance?

**A.** Relative to the benchmark, the Portfolio's overall stock selection had a negative impact on performance. In particular, stock selection in the communication services, IT, industrials, consumer discretionary and health care sectors and an overweight to the health care sector hurt performance.

In terms of individual Portfolio holdings, leading detractors from performance for the reporting period included positions in Wolfspeed in the IT sector, Etsy in the consumer discretionary sector, Insulet in the health care sector, Diageo in the consumer staples sector and Johnson Controls International in the industrials sector.

### **Q. Were there any significant changes to the Portfolio during the reporting period?**

**A.** Over the course of the period, we established eleven new positions that remained in the Portfolio at period end. The Portfolio's largest purchases were Accenture and ServiceNow in the IT sector, Pinterest in the communication services sector, TJX in the consumer discretionary sector and Cintas in the industrials sector.

In an effort to concentrate the Portfolio in our highest conviction ideas with the best long-term growth profiles, we also closed seven positions. The largest sales included Liberty Sirius XM, Sphere Entertainment and Liberty Broadband in the communication services sector, Guardant Health in the health care sector and Lyft in the industrials sector.

Thank you for your investment in the ClearBridge Variable Aggressive Growth Portfolio. As always, we appreciate that you have chosen us to manage your assets and we remain focused on achieving the Portfolio's investment goals.

***RISKS:** Equity securities are subject to price and market fluctuations. The Portfolio may invest a significant portion of its assets in small- and mid-cap companies, which may be more volatile than investments in large-cap companies. The Portfolio may focus its investments in certain companies, industries or market sectors, increasing its vulnerability to market volatility. Investing in foreign securities is subject to certain risks not associated with domestic investing, such as currency fluctuations and changes in social, political and economic conditions, which could increase volatility. These risks are magnified in emerging markets. Emerging market countries tend to have economic, political and legal systems that are less developed and are less stable*

# Portfolio expenses (unaudited)

## Example

As a shareholder of the Portfolio, you may incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees; service and/or distribution (12b-1) fees; and other Portfolio expenses. This example is intended to help you understand your ongoing costs (in dollars) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other funds.

This example is based on an investment of \$1,000 invested on July 1, 2023 and held for the six months ended December 31, 2023.

## Actual expenses

The table below titled “Based on actual total return” provides information about actual account values and actual expenses. You may use the information provided in this table, together with the amount you invested, to estimate the expenses that you paid over the period. To estimate the expenses you paid on your account, divide your ending account value by \$1,000 (for example, an \$8,600 ending account value divided by \$1,000 = 8.6), then multiply the result by the number under the heading entitled “Expenses Paid During the Period”.

Based on actual total return <sup>1</sup>					Expenses Paid During the Period <sup>2</sup>
	Actual Total Return <sup>2</sup>	Beginning Account Value	Ending Account Value	Annualized Expense Ratio	
Class I	10.25%	\$1,000.00	\$1,102.50	0.85%	\$4.50
Class II	10.14	1,000.00	1,101.40	1.10	5.83

## Hypothetical example for comparison purposes

The table below titled “Based on hypothetical total return” provides information about hypothetical account values and hypothetical expenses based on the actual expense ratio and an assumed rate of return of 5.00% per year before expenses, which is not the Portfolio’s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use the information provided in this table to compare the ongoing costs of investing in the Portfolio and other funds. To do so, compare the 5.00% hypothetical example relating to the Portfolio with the 5.00% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table below are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transaction costs were included, your costs would have been higher.

Based on hypothetical total return <sup>1</sup>					Expenses Paid During the Period <sup>2</sup>
	Hypothetical Annualized Total Return	Beginning Account Value	Ending Account Value	Annualized Expense Ratio	
Class I	5.00%	\$1,000.00	\$1,020.92	0.85%	\$4.33
Class II	5.00	1,000.00	1,019.66	1.10	5.60

- <sup>1</sup> For the six months ended December 31, 2023.
- <sup>2</sup> Assumes the reinvestment of all distributions, including returns of capital, if any, at net asset value. Total return is not annualized, as it may not be representative of the total return for the year. Total returns do not reflect expenses associated with separate accounts such as administrative fees, account charges and surrender charges, which, if reflected, would reduce the total returns. Performance figures may reflect compensating balance arrangements, fee waivers and/or expense reimbursements. In the absence of compensating balance arrangements, fee waivers and/or expense reimbursements, the total return would have been lower. Past performance is no guarantee of future results.
- <sup>3</sup> Expenses (net of compensating balance arrangements, fee waivers and/or expense reimbursements) are equal to each class' respective annualized expense ratio multiplied by the average account value over the period, multiplied by the number of days in the most recent fiscal half-year (184), then divided by 365.

# Portfolio performance (unaudited)

## Average annual total returns<sup>1</sup>

	Class I	Class II
Twelve Months Ended 12/31/23	24.43%	24.13%
Five Years Ended 12/31/23	8.31	8.05
Ten Years Ended 12/31/23	6.64	6.38

## Cumulative total returns<sup>1</sup>

Class I (12/31/13 through 12/31/23)	90.22%
Class II (12/31/13 through 12/31/23)	85.63

**All figures represent past performance and are not a guarantee of future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The returns shown do not reflect expenses associated with separate accounts such as administrative fees, account charges and surrender charges, which, if reflected, would reduce the total returns. Performance figures may reflect compensating balance arrangements, fee waivers and/or expense reimbursements. In the absence of compensating balance arrangements, fee waivers and/or expense reimbursements, the total return would have been lower.**

<sup>1</sup> Assumes the reinvestment of all distributions, including returns of capital, if any, at net asset value.

# Notes to financial statements

## 1. Organization and significant accounting policies

ClearBridge Variable Aggressive Growth Portfolio (the "Portfolio") is a separate diversified investment series of Legg Mason Partners Variable Equity Trust (the "Trust"). The Trust, a Maryland statutory trust, is registered under the Investment Company Act of 1940, as amended (the "1940 Act"), as an open-end management investment company.

Shares of the Portfolio may only be purchased or redeemed through variable annuity contracts and variable life insurance policies offered by the separate accounts of participating insurance companies or through eligible pension or other qualified plans.

The Portfolio follows the accounting and reporting guidance in Financial Accounting Standards Board ("FASB") Accounting Standards Codification Topic 946, *Financial Services – Investment Companies* ("ASC 946"). The following are significant accounting policies consistently followed by the Portfolio and are in conformity with U.S. generally accepted accounting principles ("GAAP"), including, but not limited to, ASC 946. Estimates and assumptions are required to be made regarding assets, liabilities and changes in net assets resulting from operations when financial statements are prepared. Changes in the economic environment, financial markets and any other parameters used in determining these estimates could cause actual results to differ. Subsequent events have been evaluated through the date the financial statements were issued.

**(a) Investment valuation.** Equity securities for which market quotations are available are valued at the last reported sales price or official closing price on the primary market or exchange on which they trade. The valuations for fixed income securities (which may include, but are not limited to, corporate, government, municipal, mortgage-backed, collateralized mortgage obligations and asset-backed securities) and certain derivative instruments are typically the prices supplied by independent third party pricing services, which may use market prices or broker/dealer quotations or a variety of valuation techniques and methodologies. The independent third party pricing services typically use inputs that are observable such as issuer details, interest rates, yield curves, prepayment speeds, credit risks/spreads, default rates and quoted prices for similar securities. Investments in open-end funds are valued at the closing net asset value per share of each fund on the day of valuation. When the Portfolio holds securities or other assets that are denominated in a foreign currency, the Portfolio will normally use the currency exchange rates as of 4:00 p.m. (Eastern Time). If independent third party pricing services are unable to supply prices for a portfolio investment, or if the prices supplied are deemed by the manager to be unreliable, the market price may be determined by the manager using quotations from one or more broker/dealers or at the transaction price if the security has recently been purchased and no value has yet been obtained from a pricing service or pricing broker. When reliable prices are not readily available, such as when the value of a security has been significantly affected by events after the close of the exchange or market on which the security is principally traded, but before the Portfolio calculates its net asset

value, the Portfolio values these securities as determined in accordance with procedures approved by the Portfolio's Board of Trustees.

Pursuant to policies adopted by the Board of Trustees, the Portfolio's manager has been designated as the valuation designee and is responsible for the oversight of the daily valuation process. The Portfolio's manager is assisted by the Global Fund Valuation Committee (the "Valuation Committee"). The Valuation Committee is responsible for making fair value determinations, evaluating the effectiveness of the Portfolio's pricing policies, and reporting to the Portfolio's manager and the Board of Trustees. When determining the reliability of third party pricing information for investments owned by the Portfolio, the Valuation Committee, among other things, conducts due diligence reviews of pricing vendors, monitors the daily change in prices and reviews transactions among market participants.

The Valuation Committee will consider pricing methodologies it deems relevant and appropriate when making fair value determinations. Examples of possible methodologies include, but are not limited to, multiple of earnings; discount from market of a similar freely traded security; discounted cash-flow analysis; book value or a multiple thereof; risk premium/yield analysis; yield to maturity; and/or fundamental investment analysis. The Valuation Committee will also consider factors it deems relevant and appropriate in light of the facts and circumstances. Examples of possible factors include, but are not limited to, the type of security; the issuer's financial statements; the purchase price of the security; the discount from market value of unrestricted securities of the same class at the time of purchase; analysts' research and observations from financial institutions; information regarding any transactions or offers with respect to the security; the existence of merger proposals or tender offers affecting the security; the price and extent of public trading in similar securities of the issuer or comparable companies; and the existence of a shelf registration for restricted securities.

For each portfolio security that has been fair valued pursuant to the policies adopted by the Board of Trustees, the fair value price is compared against the last available and next available market quotations. The Valuation Committee reviews the results of such back testing monthly and fair valuation occurrences are reported to the Board of Trustees quarterly.

The Portfolio uses valuation techniques to measure fair value that are consistent with the market approach and/or income approach, depending on the type of security and the particular circumstance. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable securities. The income approach uses valuation techniques to discount estimated future cash flows to present value.

## Notes to financial statements (cont'd)

GAAP establishes a disclosure hierarchy that categorizes the inputs to valuation techniques used to value assets and liabilities at measurement date. These inputs are summarized in the three broad levels listed below:

- Level 1 — unadjusted quoted prices in active markets for identical investments
- Level 2 — other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 — significant unobservable inputs (including the Portfolio's own assumptions in determining the fair value of investments)

The inputs or methodologies used to value securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used in valuing the Portfolio's assets carried at fair value:

<b>ASSETS</b>				
Description	Quoted Prices (Level 1)	Other Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Long-Term Investments†:

<b>Total Investments</b>	<b>\$184,610,196</b>	<b>—</b>	<b>\$ 0*</b>	<b>\$184,610,196</b>

† See Schedule of Investments for additional detailed categorizations.

\* Amount represents less than \$1.

**(b) Foreign investment risks.** The Portfolio's investments in foreign securities may involve risks not present in domestic investments. Since securities may be denominated in foreign currencies, may require settlement in foreign currencies or may pay interest or dividends in foreign currencies, changes in the relationship of these foreign currencies to the U.S. dollar can significantly affect the value of the investments and earnings of the Portfolio. Foreign investments may also subject the Portfolio to foreign government exchange restrictions, expropriation, taxation or other political, social or economic developments, all of which affect the market and/or credit risk of the investments.

**(c) Security transactions and investment income.** Security transactions are accounted for on a trade date basis. Interest income (including interest income from payment-in-kind securities) is recorded on the accrual basis. Amortization of premiums and accretion of discounts on debt securities are recorded to interest income over the lives of the respective securities, except for premiums on certain callable debt securities, which are amortized to

the earliest call date. Dividend income is recorded on the ex-dividend date for dividends received in cash and/or securities. Foreign dividend income is recorded on the ex-dividend date or as soon as practicable after the Portfolio determines the existence of a dividend declaration after exercising reasonable due diligence. The cost of investments sold is determined by use of the specific identification method. To the extent any issuer defaults or a credit event occurs that impacts the issuer, the Portfolio may halt any additional interest income accruals and consider the realizability of interest accrued up to the date of default or credit event.

**(d) Distributions to shareholders.** Distributions from net investment income and distributions of net realized gains, if any, are declared at least annually. Distributions to shareholders of the Portfolio are recorded on the ex-dividend date and are determined in accordance with income tax regulations, which may differ from GAAP.

**(e) Share class accounting.** Investment income, common expenses and realized/unrealized gains (losses) on investments are allocated to the various classes of the Portfolio on the basis of daily net assets of each class. Fees relating to a specific class are charged directly to that share class.

**(f) Compensating balance arrangements.** The Portfolio has an arrangement with its custodian bank whereby a portion of the custodian's fees is paid indirectly by credits earned on the Portfolio's cash on deposit with the bank.

**(g) Federal and other taxes.** It is the Portfolio's policy to comply with the federal income and excise tax requirements of the Internal Revenue Code of 1986 (the "Code"), as amended, applicable to regulated investment companies. Accordingly, the Portfolio intends to distribute its taxable income and net realized gains, if any, to shareholders in accordance with timing requirements imposed by the Code. Therefore, no federal or state income tax provision is required in the Portfolio's financial statements.

Management has analyzed the Portfolio's tax positions taken on income tax returns for all open tax years and has concluded that as of December 31, 2023, no provision for income tax is required in the Portfolio's financial statements. The Portfolio's federal and state income and federal excise tax returns for tax years for which the applicable statutes of limitations have not expired are subject to examination by the Internal Revenue Service and state departments of revenue.

**(h) Reclassification.** GAAP requires that certain components of net assets be reclassified to reflect permanent differences between financial and tax reporting. These reclassifications have no effect on net assets or net asset value per share. During the current year, the Portfolio had no reclassifications.

## **2. Investment management agreement and other transactions with affiliates**

Franklin Templeton Fund Adviser, LLC ("FTFA") (formerly known as Legg Mason Partners Fund Advisor, LLC ("LMPFA") prior to November 30, 2023) is the Portfolio's investment

## Notes to financial statements (cont'd)

manager and ClearBridge Investments, LLC ("ClearBridge") is the Portfolio's subadviser. Western Asset Management Company, LLC ("Western Asset") manages the portion of the Portfolio's cash and short-term instruments allocated to it. FTFA, ClearBridge and Western Asset are indirect, wholly-owned subsidiaries of Franklin Resources, Inc. ("Franklin Resources").

Under the investment management agreement, the Portfolio pays an investment management fee, calculated daily and paid monthly, in accordance with the following breakpoint schedule:

Average Daily Net Assets	Annual Rate
First \$1 billion	0.750%
Next \$1 billion	0.725
Next \$3 billion	0.700
Next \$5 billion	0.675
Over \$10 billion	0.650

FTFA provides administrative and certain oversight services to the Portfolio. FTFA delegates to the subadviser the day-to-day portfolio management of the Portfolio, except for the management of the portion of the Portfolio's cash and short-term instruments allocated to Western Asset. For its services, FTFA pays ClearBridge a fee monthly, at an annual rate equal to 70% of the net management fee it receives from the Portfolio. For Western Asset's services to the Portfolio, FTFA pays Western Asset monthly 0.02% of the portion of the Portfolio's average daily net assets that are allocated to Western Asset by FTFA.

As a result of expense limitation arrangements between the Portfolio and FTFA, the ratio of total annual fund operating expenses, other than interest, brokerage commissions, taxes, extraordinary expenses and acquired fund fees and expenses, to average net assets of Class I and Class II shares did not exceed 0.90% and 1.15%, respectively. These expense limitation arrangements cannot be terminated prior to December 31, 2025 without the Board of Trustees' consent. In addition, the manager has agreed to waive the Portfolio's management fee to an extent sufficient to offset the net management fee payable in connection with any investment in an affiliated money market fund (the "affiliated money market fund waiver"). The affiliated money market fund waiver is not subject to the recapture provision discussed below.

During the year ended December 31, 2023, fees waived and/or expenses reimbursed amounted to \$914, all of which was an affiliated money market fund waiver.

FTFA is permitted to recapture amounts waived and/or reimbursed to a class during the same fiscal year if the class' total annual fund operating expenses have fallen to a level below the expense limitation ("expense cap") in effect at the time the fees were earned or the expenses incurred. In no case will FTFA recapture any amount that would result, on any particular business day of the Portfolio, in the class' total annual fund operating expenses exceeding the expense cap or any other lower limit then in effect.

Franklin Distributors, LLC (“Franklin Distributors”) serves as the Portfolio’s sole and exclusive distributor. Franklin Distributors is an indirect, wholly-owned broker-dealer subsidiary of Franklin Resources. Franklin Templeton Investor Services, LLC (“Investor Services”) serves as the Portfolio’s shareholder servicing agent and acts as the Portfolio’s transfer agent and dividend-paying agent. Investor Services is an indirect, wholly-owned subsidiary of Franklin Resources. Each class of shares of the Portfolio pays transfer agent fees to Investor Services for its performance of shareholder servicing obligations. Investor Services charges account-based fees based on the number of individual shareholder accounts, as well as a fixed percentage fee based on the total account-based fees charged. In addition, each class reimburses Investor Services for out of pocket expenses incurred. For the year ended December 31, 2023, the Portfolio incurred transfer agent fees as reported on the Statement of Operations, of which \$1,887 was earned by Investor Services.

All officers and one Trustee of the Trust are employees of Franklin Resources or its affiliates and do not receive compensation from the Trust.

### 3. Investments

During the year ended December 31, 2023, the aggregate cost of purchases and proceeds from sales of investments (excluding short-term investments) were as follows:

Purchases	\$20,793,034
Sales	33,225,186

At December 31, 2023, the aggregate cost of investments and the aggregate gross unrealized appreciation and depreciation of investments for federal income tax purposes were as follows:

	Cost	Gross Unrealized Appreciation	Gross Unrealized Depreciation	Net Unrealized Appreciation
Securities	\$96,806,308	\$101,548,240	\$(13,744,352)	\$87,803,888

### 4. Derivative instruments and hedging activities

During the year ended December 31, 2023, the Portfolio did not invest in derivative instruments.

### 5. Class specific expenses, waivers and/or expense reimbursements

The Portfolio has adopted a Rule 12b-1 shareholder services and distribution plan and under that plan the Portfolio pays service and/or distribution fees with respect to its Class II shares calculated at the annual rate of 0.25% of the average daily net assets of the class. Service and/or distribution fees are accrued daily and paid monthly.

### 7. Shares of beneficial interest

At December 31, 2023, the Trust had an unlimited number of shares of beneficial interest authorized with a par value of \$0.00001 per share. The Portfolio has the ability to issue multiple classes of shares. Each class of shares represents an identical interest and has the same rights, except that each class bears certain direct expenses, including those specifically related to the distribution of its shares.

Transactions in shares of each class were as follows:

	Year Ended December 31, 2023		Year Ended December 31, 2022	
	Shares	Amount	Shares	Amount
<b>Class I</b>

## 8. Transactions with affiliated company

As defined by the 1940 Act, an affiliated company is one in which the Portfolio owns 5% or more of the outstanding voting securities, or a company which is under common ownership or control with the Portfolio. The following company was considered an affiliated company for all or some portion of the year ended December 31, 2023. The following transactions were effected in such company for the year ended December 31, 2023.

	Affiliate Value at December 31, 2022	Purchased		Sold	
		Cost	Shares	Proceeds	Shares
Western Asset Premier Institutional U.S. Treasury Reserves, Premium Shares	\$400,328	\$9,189,296	9,189,296	\$8,348,614	8,348,614

(cont'd)	Realized Gain (Loss)	Dividend Income	Net Increase (Decrease) in Unrealized Appreciation (Depreciation)	Affiliate Value at December 31, 2023
Western Asset Premier Institutional U.S. Treasury Reserves, Premium Shares	—	\$55,126	—	\$1,241,010

## 9. Redemption facility

The Portfolio, together with other U.S. registered and foreign investment funds (collectively, the "Borrowers") managed by Franklin Resources or its affiliates, is a borrower in a joint syndicated senior unsecured credit facility totaling \$2.675 billion (the "Global Credit Facility"). The Global Credit Facility provides a source of funds to the Borrowers for temporary and emergency purposes, including the ability to meet future unanticipated or unusually large redemption requests. Unless renewed, the Global Credit Facility will terminate on January 31, 2025.

Under the terms of the Global Credit Facility, the Portfolio shall, in addition to interest charged on any borrowings made by the Portfolio and other costs incurred by the Portfolio, pay its share of fees and expenses incurred in connection with the implementation and maintenance of the Global Credit Facility, based upon its relative share of the aggregate net

## Notes to financial statements (cont'd)

assets of all the Borrowers, including an annual commitment fee of 0.15% based upon the unused portion of the Global Credit Facility. These fees are reflected in the Statement of Operations. The Portfolio did not utilize the Global Credit Facility during the year ended December 31, 2023.

### 10. Income tax information and distributions to shareholders

The tax character of distributions paid during the fiscal years ended December 31, was as follows:

	2023	2022
<b>Distributions paid from:</b>		
Ordinary income	\$ 389,535	\$ 725,411
Net long-term capital gains	17,411,661	23,612,745
<b>Total distributions paid</b>	<b>\$17,801,196</b>	<b>\$24,338,156</b>

As of December 31, 2023, the components of distributable earnings (loss) on a tax basis were as follows:

Undistributed ordinary income — net	\$ 146,428
Undistributed long-term capital gains — net	3,076,542
<b>Total undistributed earnings</b>	<b>\$ 3,222,970</b>
Other book/tax temporary differences <sup>(a)</sup>	(41,528)
Unrealized appreciation (depreciation) <sup>(b)</sup>	87,803,888
<b>Total distributable earnings (loss) — net</b>	<b>\$90,985,330</b>

<sup>(a)</sup> Other book/tax temporary differences are attributable to the book/tax differences in the timing of the deductibility of various expenses.

<sup>(b)</sup> The difference between book-basis and tax-basis unrealized appreciation (depreciation) is attributable to the tax deferral of losses on wash sales.

### 11. Recent accounting pronouncement

In June 2022, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2022-03, *Fair Value Measurement (Topic 820) – Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions*. The amendments in the ASU clarify that a contractual restriction on the sale of an equity security is not considered part of the unit of account of the equity security and, therefore, should not be considered in measuring fair value. The ASU is effective for interim and annual reporting periods beginning after December 15, 2023, with the option of early adoption. Management has reviewed the requirements and believes that the adoption of the ASU will not have a material impact on the financial statements.

### 12. Subsequent events

Effective May 1, 2024, the Portfolio will be renamed ClearBridge Variable Growth Portfolio. There is no change to the Portfolio's investment objective, principal investment strategies or investment policies as a result of the name change.

In addition, effective May 1, 2024, the Russell Midcap Growth Index is replacing the Russell 3000 Growth Index as the Portfolio's benchmark. The Portfolio's subadviser believes the Russell Midcap Growth Index will provide a better representation of the universe of securities in which the Portfolio invests.

# Report of independent registered public accounting firm

## To the Board of Trustees of Legg Mason Partners Variable Equity Trust and Shareholders of ClearBridge Variable Aggressive Growth Portfolio

### Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities, including the schedule of investments, of ClearBridge Variable Aggressive Growth Portfolio (one of the portfolios constituting Legg Mason Partners Variable Equity Trust, referred to hereafter as the "Portfolio") as of December 31, 2023, the related statement of operations for the year ended December 31, 2023, the statement of changes in net assets for each of the two years in the period ended December 31, 2023, including the related notes, and the financial highlights for each of the five years in the period ended December 31, 2023 (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Portfolio as of December 31, 2023, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period ended December 31, 2023 and the financial highlights for each of the five years in the period ended December 31, 2023 in conformity with accounting principles generally accepted in the United States of America.

### Basis for Opinion

These financial statements are the responsibility of the Portfolio's management. Our responsibility is to express an opinion on the Portfolio's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Portfolio in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of December 31, 2023 by correspondence with the custodian. We believe that our audits provide a reasonable basis for our opinion.
